Maze Practice

1 (I couldn't agree more , I am hoping , I plan to) that environment really suffers. 2 (What does it cause / What causes / What it causes) most concern today is climate change. 3 (It is / There is / This is) human activity that drives global warming. 4 (Pollutant / Pollution/ Polluted) spreads quickly because of industrial waste, 5 (but / so / yet) many animals are at risk. To help, I 6 (suggest / plan / hope) changing our attitudes towards environment, 7 (which it can / Which can it / which can) make us succeed.

We all 8 (should reduce /should have reducing / should be reduced) energy use to help. If we 9 (have followed / had followed / have had followed) this, we could avoid many problems. We 10 (should have done / should do / should be doing) this long time ago.

We all 11 (agree / plan / intend) that recycling helps much, 12 (so / but / and) some people still don't do it. Forests, 13 (which they absorb / which they to absorb / which absorb) CO₂, are being cut down. People 14 (who they live / where they live / who live) near them notice rising temperatures. Many people don't realize the 15 (significant / significantly / significance) of forests. If they knew , they 16 (would stopped / would have stopped / would have been stopped) damaging forests.

17 (Carefully , Hopefully / Awfully), we can slow down damage 18 (on condition that / on the other hand / on the contrary) nations work together. Forests can recover 19 (as much as / as far as / as long as) deforestation stops. Green energy is 20 (the best / better than / more better than) fossil fuels. It helps preserving the environment 21 (provided that / to provide that / to provided that) it's widely used. The 22 (creation / creative / create) of green jobs is growing.

People must act, **23 (so / but / or)** future generations are safe. We must do something urgently, **24 (but / and / or)** we will lose control. Progress is slow. There has been much **25 (improve , improvement , improved)** in using renewable energy. Solar power is growing faster . It is **26 (the most popular / more popular than / much popular than)** coal or oil.

If we had acted sooner, the problem **27 (wouldn't be / isn't / weren't)** this serious. **28 (What do we decide / That we decide / What we decide)** today shapes tomorrow. If industries changed earlier, we **29 (would have saved / will save / will have save)** more resources.

30 (It is / It is that / It is for) our responsibility to act. We need global change, **31 (and / or / because)** local efforts too. We wouldn't face this crisis if we **32 (had planned / have had plan / have planned)** better. If I **33 (am / was / were)** you, I'd have started doing something.

We can reverse damage **34 (if / unless / although)** we use clean energy. Change will come **35 (on condition that / because / unless)** we work together. **36 (I'd plan / I'd intend / I'd recommend)** supporting clean transport. Use products **37 (which they / that it / which)** decrease waste. The solutions now are getting more promising. We should **38 (have been / have be / had been)** more responsible when all this started. The damage won't stop **39 (if / unless / as long as /)** we act immediately.

40 (Providing / Although / Because) we cooperate, change is possible. Climate action is urgent. Some **41 (shouldn't / wouldn't / couldn't)** wait for others to lead. **42 (All that does / All that / All it what)** gives hope is how many people now care. Would you **43 (expect / consider / provide)** doing something now? **44 (How often / How much / How many)** plastic do you use every day? Try , for example , to use **45 (little / less / least)** plastic than you used to do before. It is **46 (much / more / most)** convenient to begin right now than **47 (to wait / to have waited / to have been waiting)** longer.
