البيئة والاستدامة Environment & Sustainability

Word	English Meaning	Arabic Meaning	Example Sentence
natural resources	Materials found in nature like water, forests, or minerals	الموارد الطبيعية	We must protect natural resources for future generations.
global warming	The gradual increase in Earth's temperature due to pollution	الاحتباس الحراري	Global warming is causing ice caps to melt.
renewable	Can be replaced naturally and reused	متجدد	Wind energy is a renewable source of power.
conservation	Protection of nature and natural resources	الحفاظ على البيئة	Water conservation is important during droughts.
habitat	The natural home of an animal or plant	موطن طبيعي	Many animals lost their habitat due to deforestation.
species	A group of similar living organisms	نوع / فصيلة	Several bird species migrate each year.
consume	To use up a resource like energy or food	يستهلك	We consume a lot of electricity in summer.

Workplace & People الناس وأماكن العمل

Word	English Meaning	Arabic Meaning	Example Sentence
employees	People who work for a business or organization	الموظفون	The company has 200 employees.
working environment	The conditions in which people work	بيئة العمل	A positive working environment helps workers perform better.
initiative	A new plan or action to solve a problem or improve a situation	مبادرة	The school launched an initiative to reduce waste.
objective	A goal or purpose	هدف	Our main objective is to finish the project on time.
encourage	To give support or confidence to someone	يشجع	Teachers encourage students to ask questions.

Technology & Infrastructure التكنولوجيا والبنية التحتية

Word	English Meaning	Arabic Meaning	Example Sentence
fuel-efficient	Uses less fuel than usual to work effectively	موفر للوقود	Fuel-efficient cars help reduce emissions.
install	To put in place for use (equipment or software)	يركب / يثبت	We will install new lights in the office.
network	A system of connections or communication	شبكة	The computer is connected to the local network.
renewable	Can be replaced naturally and reused, especially related to energy sources	متجدد	Solar power is a renewable form of energy.
consume	To use up a resource like energy or food	يستهلك	We consume a lot of electricity in summer.

Technology & Infrastructure – Vocabulary Multiple Choice Test

Choose the best word to complete each sentence.

1. The company plans to _____ a new security system in all office buildings by next week.

- a) consume
- b) encourage
- c) install
- d) species

2. Electric buses are more _____ than diesel ones and help reduce air pollution.

- a) renewable
 - b) fuel-efficient
 - c) passive
 - d) global
-

3. This wind farm produces energy from a _____ source that doesn't run out.

- a) fuel-efficient
- b) natural
- c) working
- d) renewable

4. All the computers in the office are connected to the same _____.

- a) habitat
- b) network
- c) initiative
- d) dish

5. Many countries are investing in _____ energy like solar and wind to fight climate change.

- a) renewable
- b) working
- c) neither
- d) desert

Model Answers

1. c) install
2. b) fuel-efficient
3. d) renewable
4. b) network
5. a) renewable

Environment & Sustainability – Vocabulary Test

Choose the best word to complete each sentence.

6. We must protect our _____ like forests, rivers, and minerals for the future.

- a) species
- b) habitat
- c) natural resources
- d) employees

7. Many animals lose their _____ due to deforestation and pollution.

- a) objective
- b) habitat
- c) dish
- d) installer

8. Turning off the lights when not in use helps to _____ energy.

- a) consume
- b) encourage
- c) install
- d) conserve

9. The rise in Earth's temperature is called _____.

- a) conservation
- b) habitat
- c) global warming
- d) working environment

10. Scientists are trying to protect endangered _____ from extinction.

- a) species
- b) employees
- c) networks
- d) initiatives

Workplace & People – Vocabulary Test

Choose the best word to complete each sentence.

11. All _____ must follow the company's safety guidelines.

- a) employees
- b) species
- c) habitats
- d) resources

12. A clean and quiet office is part of a healthy _____.

- a) fuel-efficient
- b) working environment
- c) global warming
- d) technique

13. The manager started a new _____ to promote recycling in the office.

- a) species
- b) habitat
- c) initiative
- d) dessert

14. The company's main _____ is to reduce waste by 50% this year.

- a) dish
- b) objective
- c) network
- d) advertisement

15. Good leaders often _____ their teams to be creative and take risks.

- a) install
- b) consume
- c) encourage
- d) produce

Model Answers

Environment & Sustainability

- 6. c) natural resources
- 7. b) habitat
- 8. a) consume
- 9. c) global warming
- 10. a) species

Workplace & People

- 11. a) employees
- 12. b) working environment
- 13. c) initiative
- 14. b) objective
- 15. c) encourage

=====

Grammar

Choose the best word or phrase to complete each sentence.

1. The woman _____ helped me yesterday works in that shop.

- a) which
- b) whose
- c) who
- d) what

2. This is the book _____ I borrowed from the library.

- a) who
- b) that
- c) where
- d) whose

3. My brother, _____ lives in Canada, is visiting next week.

- a) who
- b) which
- c) that
- d) where

4. I'm about _____ leave. Can we talk later?

- a) to
- b) for
- c) by
- d) of

5. He _____ call me later, but I'm not sure.

- a) should
- b) may
- c) must
- d) will to

6. I wish I _____ gone to the party last night.

- a) had
- b) have
- c) had been
- d) should

7. If I _____ more time, I would travel the world.

- a) have
- b) had
- c) will have
- d) has

8. You ____ have told me earlier! Now it's too late.

- a) could
- b) should
- c) might
- d) shouldn't

9. I think we ____ try a new restaurant this weekend.

- a) should
- b) had to
- c) might have
- d) are about

10. The more you practice, ____ you become.

- a) the more confident
- b) more confident
- c) the most confident
- d) most confident

11. He speaks ____ clearly than before.

- a) most
- b) more
- c) very
- d) better

12. That was a good suggestion, and I completely ____.

- a) argue
- b) recommend
- c) agree
- d) advice

13. If only I ____ earlier, I wouldn't have missed the train.

- a) leave
- b) left
- c) had left
- d) would leave

14. The book you gave me, ____ cover is blue, was amazing.

- a) which
- b) whose
- c) that
- d) who

15. Can you recommend a movie that's ____ exciting than this one?

- a) more
- b) most
- c) much
- d) more and more

Model Answers

1. c) who
2. b) that
3. a) who
4. a) to
5. b) may
6. a) had
7. b) had
8. b) should
9. a) should
10. a) the more confident
11. b) more
12. c) agree
13. c) had left
14. b) whose
15. a) more

SAMPLE TEST

Part 1 – Opinion (5 marks)

Question:

Do you think technology can solve environmental problems in the future? Give your opinion in 2–3 sentences.

Part 2 – Plan (5 marks)

Question:

Plan a short essay on this topic:

"How businesses can help reduce environmental damage."

Use bullet points to show your introduction, three main ideas, and conclusion.

Part 3 – Extended Writing (25 marks)

Question:

Write about the following topic:

"The future of business in a changing environment."

Include these points:

- How technology is changing how companies work
- How businesses can protect the environment
- What businesses should do to help their employees

Write about 150 words. Use complex grammar and vocabulary.

Handwriting practice lines consisting of 20 horizontal dashed lines. A large, faint watermark is centered on the page, featuring a stylized figure holding a tablet and the text 'Almanahi.ca' and '2025 2024'.

Part 4 – Inference and Justification (5 marks)

In 2023, a tech startup called GreenHive launched a smart device that helped small businesses track their energy use. The founders, who were engineers and environmental activists, believed that small changes could make a big difference. Their goal was not only to reduce energy bills but also to raise awareness about sustainability.

One café owner in London installed the device and saw a 25% reduction in electricity usage within a month. The device, which uses AI to learn daily energy patterns, gives tips on how to save power. As more companies joined the initiative, GreenHive started building a community of eco-conscious entrepreneurs. What surprised many people was how quickly this movement grew. Within a year, thousands of businesses across Europe had signed up.

Some people argue that these efforts are not enough and that large corporations need to take the lead. However, others believe that every contribution counts. GreenHive’s founders, who are now working with local governments, think their technology could be scaled up for bigger industries. They are also about to launch a new version of the device for homes.

Questions:

- a) What can you infer about the success of GreenHive’s approach? (2 marks)

b) Justify your answer using evidence from the text. (3 marks)

Part 5 – MAZE

Many companies are trying to reduce the use of (1) fossil fuels / global warming / natural resources by investing in new technologies. Some use solar panels, while others (2) conserve / consume / install water-saving systems. These actions not only help the environment but also improve the company's (3) objective / image / habitat. For example, a factory that reduces its emissions may attract more customers (4) who / that / which care about sustainability.

Choose the correct word for each blank.

Part 6 – MAZE

A new software company has developed a platform (1) who / which / that helps businesses track their carbon footprint. The company, (2) who / which / whose founders used to work in environmental science, aims to make sustainability easier to measure. The software provides weekly reports

and sends alerts (3) when / which / while energy usage is too high. Companies can also set long-term goals and receive (4) recommend / recommendations / recommending to improve their performance.

Unlike traditional tools, this one uses real-time data. It connects directly to energy meters (5) that / who / where record power usage every minute. Although it's a small startup, the team is confident that the software (6) could / must / should transform the way companies manage energy. In fact, they are about to (7) launch / launching / launched a pilot program with one of the country's largest retail chains. The founders believe that the sooner businesses act, (8) the more / the most / the better impact they will have on the planet.

Part 7: Comprehension (5 marks)

Green Business Initiatives

Many small businesses are now taking steps to operate in eco-friendly ways. For example, some restaurants are removing plastic straws and switching to compostable packaging. Offices are setting up systems to sort and recycle waste.

A bakery in London recently became the first in its area to run on 100% renewable electricity, including wind and solar energy. The owner said the move saved them money in the long term. Customers appreciate these efforts and often support sustainable companies over those that don't

change.

However, these changes are not always easy. Many businesses face higher upfront costs for eco-friendly materials or technology. Still, with increasing concern about climate change, companies that ignore sustainability may lose customers in the future.

Choose the best answer:

1. Why are small businesses making eco-friendly changes?
 - a) To avoid paying taxes
 - b) Because customers support it
 - c) So they can expand quickly
2. What helped the bakery save money?
 - a) Raising prices
 - b) Reducing staff
 - c) Using renewable energy
3. What challenge do businesses face?
 - a) Finding workers
 - b) Paying for green materials
 - c) Lower sales
4. What might happen to businesses that don't go green?
 - a) They may become more popular
 - b) They could lose customers
 - c) They will be fined by the police

5. What is the tone of the text?

- a) Negative
- b) Humorous
- c) Encouraging

Part 8: Comprehension (3 marks)

The Energy Shift

Sarah, who works in a renewable energy company, is excited about a new solar farm project. The team is about to launch a campaign to educate the public about clean energy. "We want people to understand that switching to solar may seem expensive at first, but it helps reduce long-term costs," she explains.

Her company installed over 5,000 solar panels last year. "That's a record for us," she adds proudly. The company also encourages local businesses to apply for government funding to improve their buildings. "I wish more companies understood how much support is available," she says.

While there are still many challenges, Sarah believes the future is bright. "The more people get involved, the easier it becomes for everyone."

Choose the best answer:

1. What is the company about to do?
 - a) Sell its business
 - b) Launch an awareness campaign
 - c) Close the solar farm

2. Why does Sarah say she wishes more companies applied for funding?
 - a) The process is very easy
 - b) Many don't know it exists
 - c) They already applied
3. What can be said about Sarah's attitude?
 - a) She is frustrated and pessimistic
 - b) She is hopeful and positive
 - c) She is confused and uncertain

Part 9: Comprehension (7 marks)

Tech Startups and the Environment

In recent years, many startups have begun to focus on technology that helps protect the environment. One such startup, AquaNet, has created a smart network that monitors water usage in large buildings. The system detects leaks and helps users save water.

Another company, GreenGrid, developed software that controls lighting and air conditioning based on when rooms are used. This reduces energy waste. These businesses are examples of how innovation can make conservation easier.

However, many of these startups struggle with funding.

Investors often prefer projects with quicker profits.

GreenGrid's founder said, "I wish more people supported ideas that have long-term impact." Despite challenges, the founders believe that their ideas will become more popular as more people care about sustainability.

The government has also begun to notice. Last year, new

grants were made available for technology that helps the environment. This has encouraged more entrepreneurs to enter the field.

Choose the best answer:

1. What does AquaNet's technology do?
 - a) Monitors air quality
 - b) Detects water leaks
 - c) Controls heating
2. What is the benefit of GreenGrid's software?
 - a) It tracks employee hours
 - b) It reduces energy waste
 - c) It increases rent
3. What is a problem many startups face?
 - a) Lack of workers
 - b) Poor product quality
 - c) Difficulty getting investment
4. What does GreenGrid's founder wish?
 - a) He had a different idea
 - b) More support for long-term ideas
 - c) They had launched earlier
5. What did the government do last year?
 - a) Closed tech grants
 - b) Created new business rules
 - c) Offered grants for green tech

6. What helps more entrepreneurs join the field?
 - a) More customers
 - b) More government support
 - c) Less competition

7. What is the general tone of the passage?
 - a) Negative
 - b) Optimistic
 - c) Critical

Part 10: Comprehension (3 marks)

Remote Work and the Future of Offices

As technology improves, more companies are changing the way they think about offices. Instead of large office buildings, many businesses now allow remote work. This reduces energy costs, limits traffic, and saves space.

A company called WorkWise recently closed two of its offices and moved to a fully remote model. Employees report better work-life balance, and the company has cut its electricity use by 40%.

Not everyone agrees with the change. Some managers worry that remote workers are less productive. "I wish I could see my team in person more often," one manager said.

Still, the trend is growing. The government is about to release new guidelines to help businesses support hybrid work. As companies look for ways to reduce environmental

impact, remote work may be one of the simplest and most effective solutions.

Choose the best answer:

1. What change did WorkWise make?
 - a) Moved into a bigger office
 - b) Switched to remote work
 - c) Hired more workers
2. What benefit did WorkWise see?
 - a) More travel
 - b) Fewer workers
 - c) Reduced energy use
3. What is the writer's view of remote work?
 - a) Positive and forward-looking
 - b) Critical and angry
 - c) Unsure and neutral

MODEL ANSWERS

Writing Section

Part 1 – Opinion:

Yes, I think businesses should do more to protect the environment because they have a big impact. They can make changes like using renewable energy and reducing waste.

Part 2 – Plan:

- Topic sentence: Businesses can use technology to protect the environment.
- Main idea 1: Use of solar panels
- Main idea 2: Switching to digital tools
- Examples: Installing solar power in offices; using cloud computing to reduce paper waste
- Conclusion: These actions help the planet and save money over time.

Part 3 – Essay:

Protecting Natural Resources in the Future

Protecting natural resources is one of the most important challenges we face. One of the best ways to do this is by investing in renewable energy. Solar, wind, and hydro power do not pollute the environment and can replace fossil fuels, which are limited and harmful.

In addition, businesses must change the way they operate. They should use energy-efficient technology, reduce waste, and create sustainable products. These changes can also attract eco-conscious customers.

Finally, government action is essential. Governments should pass laws that help protect forests, water, and wildlife. They can also offer financial support for green companies and create educational campaigns about sustainability.

In conclusion, the future of our planet depends on how we manage natural resources. If we combine renewable energy, responsible business practices, and strong government policies, we can build a cleaner, more sustainable world.

uPart 4 – Inference & Justification:

- a) She is hopeful about the future of renewable energy.
- b) She mentions the company's success and says, "The future is bright," showing a positive attitude.

art 5 – MAZE (4 Questions)

Text (80 words):

1. fossil fuels
2. install
3. image
4. who

Full answers:

1. fossil fuels
2. install
3. image
4. who

Part 6 – MAZE (8 Questions)

Text (170 words):

1. that
2. whose
3. when
4. recommendations

5. that
6. should
7. launch
8. the better

Full answers:

1. that
2. whose
3. when
4. recommendations
5. that
6. should
7. launch
8. the better

Part 7 – Reading Comprehension (5 Marks)

Green Business Initiatives

1. b) Because customers support it
2. c) Using renewable energy
3. b) Paying for green materials
4. b) They could lose customers
5. c) Encouraging

Answers:

1. b
2. c
3. b
4. b
5. c

Part 8 – Reading Comprehension (3 Marks)

The Energy Shift

1. b) Launch an awareness campaign
2. b) Many don't know it exists
3. b) She is hopeful and positive

Answers:

1. b
2. b
3. b

Part 9 – Reading Comprehension (7 Marks)

Tech Startups and the Environment

1. b) Detects water leaks
2. b) It reduces energy waste
3. c) Difficulty getting investment
4. b) More support for long-term ideas
5. c) Offered grants for green tech
6. b) More government support

7. b) Optimistic

Answers:

1. b
2. b
3. c
4. b
5. c
6. b
7. b

Part 10 – Reading Comprehension (3 Marks)

Remote Work and the Future of Offices

1. b) Switched to remote work
2. c) Reduced energy use
3. a) Positive and forward-looking

✓ Answers:

1. b
2. c
3. a

Writing Test 1: Environment

Exam Prompt: "We must protect nature to protect ourselves."

Part 1: Opinion Question

What is your opinion about the saying "We must protect nature to protect ourselves"? Write at least two sentences expressing your viewpoint.

Part 2: Plan

Write a plan for an essay on the topic "We must protect nature to protect ourselves."

Write about:

- How human survival depends on natural systems
- The impact of pollution, deforestation, and climate change
- Ways we can protect nature in daily life

Part 3: Essay

Write an essay on the topic "We must protect nature to protect ourselves."
Include:

- The role of natural resources in human survival
- How environmental destruction leads to human suffering
- Examples of how individuals and governments can act

(Write at least 200 words in paragraphs.)

Part 4: Inference and Justification

Reading Text:

Nature is not just beautiful; it is essential to our existence. Forests give us oxygen, oceans regulate the climate, and bees pollinate crops. Yet human activities are destroying these systems. Deforestation, air pollution, and plastic waste have reached dangerous levels. As a result, we face more extreme weather, food insecurity, and the spread of diseases.

Scientists warn that the health of the planet is directly linked to human well-being. When ecosystems collapse, so do economies. Jobs in farming, fishing, and tourism suffer. Clean water becomes scarce, and natural disasters become more frequent and deadly.

Fortunately, there is still time to make changes. Recycling, using renewable energy, and reducing meat consumption can all help. Governments must enforce environmental laws, invest in green technology, and educate citizens about sustainability.

Protecting nature is not just about saving animals and plants. It is about saving ourselves. If we want a healthy future, we must care for the world we live in.

Inference Question:

Does the author believe that environmental protection is directly related to human survival?

Justification Question:

Why is your answer to the inference question the best answer? Use details from the text to support your response.

Writing Test 2: Technology

Exam Prompt: "Technology makes life easier but more complicated."

Part 1: Opinion Question

Do you agree or disagree with the idea that technology makes life both easier and more complicated? Write at least two sentences expressing your viewpoint.

Part 2: Plan

Write a plan for an essay on the topic "Technology makes life easier but more complicated."

Write about:

- Benefits of modern technology (e.g., speed, convenience)
- Problems it creates (e.g., stress, screen addiction, privacy loss)
- Finding a balance in tech use

Part 3: Essay

Write an essay on the topic "Technology makes life easier but more complicated." Include:

- How technology improves communication and daily tasks
- How it causes new challenges
- Examples of healthy tech habits

(Write at least 200 words in paragraphs.)

Part 4: Inference and Justification

Reading Text:

Technology has changed our world in remarkable ways. Today, we can talk to someone on the other side of the planet in seconds. We can shop, study, and work from our phones. Smart devices can turn on lights, play music, and remind us of appointments. All of this saves time and increases convenience.

However, this constant connection has a downside. Many people feel overwhelmed by the number of notifications they receive every day. Social media creates pressure to always be available and perfect. Screen time has increased, leading to sleep problems, eye strain, and reduced physical activity. Cyberbullying and online fraud are growing issues. While technology helps us connect, it also creates stress and anxiety.

Experts suggest that people learn to manage their tech use. Turning off unnecessary alerts, setting time limits, and taking digital breaks can reduce stress. Technology is a tool—it should serve us, not control us.

Inference Question:

Does the author believe that people need to change how they use technology?

Justification Question:

Why is your answer to the inference question the best answer? Use details from the text to support your response.

Writing Test 3: Business

Exam Prompt: "Small businesses are the heart of the economy."

Part 1: Opinion Question

Do you agree or disagree with the idea that small businesses are the heart of the economy? Write at least two sentences expressing your viewpoint.

Part 2: Plan

Write a plan for an essay on the topic "Small businesses are the heart of the economy."

Write about:

- The role of small businesses in job creation and innovation
 - How they support communities
 - Challenges they face
-
-
-

Part 3: Essay

Write an essay on the topic "Small businesses are the heart of the economy." Include:

- Their role in local and national growth
- Examples of how small businesses support people
- What can be done to help them grow

(Write at least 200 words in paragraphs.)

Part 4: Inference and Justification

Reading Text:

Small businesses make up the majority of companies in most countries. They are owned by individuals or families and often serve local communities. These businesses offer jobs, bring creativity, and provide unique services or products. From bakeries and repair shops to small tech startups, they are everywhere.

While large corporations dominate headlines, small businesses keep economies stable. They create more than half of all new jobs and help reduce poverty by offering employment in diverse neighborhoods. Small businesses also keep money circulating in the local economy, supporting schools, housing, and services.

However, small businesses face big challenges. They often struggle with limited resources, competition from large chains, and changing market conditions. During economic crises, many of them close permanently.

To help small businesses thrive, governments can offer tax breaks, funding, and training. Communities can support them by shopping locally and promoting small enterprises. Strong small businesses mean strong communities.

Inference Question:

Does the author believe small businesses play a major role in the economy?

Justification Question:

Why is your answer to the inference question the best answer? Use details from the text to support your response.

Model Answers

Environment Model Inference Answer:

Yes, the author believes that environmental protection is directly related to human survival.

Justification:

The author states that natural systems like forests and oceans are essential to human life. The text explains how pollution and ecosystem collapse lead to serious problems like disease and natural disasters. It also says, "Protecting nature is not just about saving animals and plants. It is about saving ourselves."

Technology Model Inference Answer:

Yes, the author believes people need to change how they use technology.

Justification:

The author discusses both the benefits and the problems of modern technology. The text suggests people feel overwhelmed and anxious because of too much screen time and social media. It recommends

solutions like turning off notifications and taking digital breaks, showing that behavior change is necessary.

Business Model Inference Answer:

Yes, the author believes small businesses play a major role in the economy.

Justification:

The text states that small businesses create more than half of all new jobs and help reduce poverty. They support local economies and communities. Even though they face challenges, the author says they are essential for economic health.
