Summary Writing Practice

Focus Areas: Smart Homes & Comparing Two Places

Sherien Adel

How to Master the Contrast Summary

Follow these guidelines to structure your 4–5 sentence response.

Identify View A.

Read the first half of the text to locate the primary argument or benefit.

Identify View B.

Look for transition words (However, In contrast) to locate the opposing argument.

Paraphrase.

Rewrite both viewpoints using your own vocabulary. Do not copy sentences directly.

Check Length.

Ensure your final summary is exactly 4 to 5 complete sentences.

Gemini Notebook

Part 1: Smart Homes

Question 1: Are Smart Homes a Good Choice?

Smart homes have become increasingly popular as technology continues to change the way people live. Some people believe that smart home systems make life easier, safer, and more comfortable. For example, residents can control lights, air conditioning, and household appliances using their smartphones. Smart security cameras also allow homeowners to monitor their properties when they are away.
Furthermore, automated systems can reduce energy consumption by switching off unused devices, which may help families save money.

Sherien Adel

However, other people believe that smart homes create more problems than benefits. They argue that installing advanced technology can be expensive, particularly for families with limited budgets. Smart devices also depend heavily on internet connections and electricity, meaning that technical technical failures may interrupt daily activities. Another concern is privacy, as some devices collect personal information about their users. If these systems are not properly protected, hackers may access sensitive data. Critics also point out that people can enjoy comfortable lives without relying on complicated technology. Although smart homes offer convenience and modern solutions, their disadvantages make some homeowners question whether they are truly necessary.

Task: Read the text carefully, then summarise the two contrasting points of view about smart homes in 4–5 complete sentences, using your own words.

Part 1: Smart Homes

Question 2: Do Smart Homes Help Protect the Environment?

As environmental concerns increase, smart home technology is often presented as a useful way to reduce energy consumption. Supporters argue that smart thermostats, automatic lighting, and energy-monitoring systems help households use electricity more efficiently. These devices can adjust heating and cooling according to residents' needs and prevent unnecessary energy use. Smart irrigation systems can also reduce water waste by controlling when gardens are watered. According to supporters, adopting these technologies can lower household bills while encouraging environmentally responsible habits.

Sherien Adel

Gemini Notebook

Nevertheless, some environmental experts question whether smart homes are always as environmentally friendly as they appear. Manufacturing electronic devices requires raw materials and energy, while transporting them contributes to pollution. In addition, smart devices may become outdated quickly, creating electronic waste that can be difficult to recycle. Some systems also consume electricity continfy, even when residents are not actively using them. Critics believe that simple actions, such as switching off unnecessary lights and improving home insulation, can achieve meaningful environmental benefits without requiring expensive technology. Therefore, while smart homes may improve energy efficiency, their overall environmental impact depends on how they are designed, used, and maintained.

Task: Read the text and summarise the contrasting views on the environmental impact of smart homes in 4–5 complete sentences.

Part 2: Comparing Two Places – Unit 2 Practice

Question 3: Living in Urban Areas vs Rural Areas

Choosing where to live is an important decision because the surrounding environment can influence people's lifestyles and opportunities. Many people prefer urban areas because cities offer a wide range of services, including hospitals, universities, shopping centres, and entertainment facilities. They also provide more employment opportunities and convenient access to public transport. For young people, cities can offer greater chances to develop professional skills and experience different cultures. These advantages make urban life attractive to individuals seeking career development and an active lifestyle.

Sherien Adel

In contrast, other people prefer rural areas because they provide peace, open spaces, and closer contact with nature. Rural communities often experience less traffic congestion and noise than large cities. Some residents also appreciate the stronger relationships that can develop in smaller communities. Living in the countryside may be more affordable in certain locations, particularly when housing costs are considered.

However, rural areas may offer fewer job opportunities and limited access to specialised healthcare, educational institutions, and public transportation. People may need to travel long distances to access essential services.

While urban areas provide convenience and professional opportunities, rural areas appeal to those who value tranquillity and a slower pace of life.

Task: Read the text and summarise the two contrasting points of view about living in urban and rural areas in 4–5 complete sentences.

Part 2: Comparing Two Places – Unit 2 Practice

Question 4: Visiting Natural Destinations vs Historical Cities

People have different preferences when choosing destinations for their holidays. Some travellers prefer natural destinations, such as mountains, forests, and beaches, because these places allow them to escape busy routines and enjoy peaceful surroundings. Outdoor activities, including hiking, swimming, and wildlife observation, can provide enjoyable experiences and encourage healthier lifestyles. Natural tourism may also support local communities by creating employment opportunities. Visitors can develop a greater appreciation for the environment and the importance of protecting natural resources.

Sherien Adel

Other travellers prefer historical cities because they offer opportunities to explore culture, architecture, and the traditions of earlier generations. Museums, ancient buildings, and historical landmarks help visitors understand how societies developed over time. Historical cities also tend to provide a variety of restaurants, hotels, and organised tours, making travel more convenient. However, popular destinations can become crowded and expensive during holiday seasons. Some historical sites may also suffer damage because of excessive tourism.
Although natural destinations provide relaxation and contact with nature, historical cities attract visitors who want cultural experiences and educational opportunities. Ultimately, both types of destinations offer valuable experiences, but they appeal to travellers with different interests and priorities.

Task: Read the text and summarise the contrasting points of view about visiting natural destinations and historical cities in 4–5 complete sentences.
