Academic Year	2025/2026
المعام الدراسي	
Term	2
الفصل	
Subject	Biology
المادة	الاحياء - Inspire
Grade	12
الصف	
Stream	Advanced
المستوى	المقدم
Number of MCQ	20
عدد الأسئلة الموضوعية	
Marks of MCQ	100
درجة الأسئلة الموضوعية	
Number of FRQ	0
عدد الأسئلة المفردة	
Marks per FRQ	
الدرجات الأسئلة المفردة	
Type of All Questions	MCQ/ الأسئلة الموضوعية
نوع كافة الأسئلة	
Maximum Overall Grade	100
الدرجة القصوى للمنتج	
Exam Duration	60 minutes
مدة الامتحان	
Mode of Implementation	SwiftAssess
طريقة التطبيق	
Calculator	Allowed
الالة الحاسبة	مسموحة

Question*	Lesson Name**	Reference(s) in the Student Book (English Version)	
		Example/Exercise	Page
السؤال*	اسم الدرس**	مثال/تمرين	الصفحة
1	Analyze a simulated strand of DNA to determine the genetic code and base pairing of DNA	Figure 3	42
2	Explain the current model of DNA replication and describe the different repair mechanisms that can correct mistakes in DNA sequencing including the mechanisms of biotechnology and bioinformatics.	Figure 9	49
3	Construct an explanation based on evidence for how the structure of DNA determines the structure of proteins which carry out the essential functions of life through systems of specialized cells.	Figure 10	52
4	Explain the current model of DNA replication and describe the different repair mechanisms that can correct mistakes in DNA sequencing including the mechanisms of biotechnology and bioinformatics.	Figure 10	50
5	Construct an explanation based on evidence for how the structure of DNA determines the structure of proteins which carry out the essential functions of life through systems of specialized cells.	Figure 10	55
6	Analyze a simulated strand of DNA to determine the genetic code and base pairing of DNA		45
7	Conclude that each distinct gene chiefly controls the production of a specific protein, which in turn affects the traits of the individual		57
8	Construct an explanation based on evidence for how the structure of DNA determines the structure of proteins which carry out the essential functions of life through systems of specialized cells.	Figure 10	53
9	Explain the current model of DNA replication and describe the different repair mechanisms that can correct mistakes in DNA sequencing including the mechanisms of biotechnology and bioinformatics.	Figure 10	50
10	Construct an explanation based on evidence for how the structure of DNA determines the structure of proteins which carry out the essential functions of life through systems of specialized cells.		55
11	Describe the mechanisms by which genetic information flows from DNA to protein, to include the Central Dogma: transcription, RNA processing and translation		54-55
12	Apply understanding of enzyme roles during replication		50
13	Describe the mechanisms by which genetic information flows from DNA to protein, to include the Central Dogma: transcription, RNA processing and translation	Figure 14	56
14	Explain why Chargaff's data was an important clue for constructing the DNA model	Figure 4	44
15	Explain experimental evidence identifying DNA as genetic material.	Figure 2	41
16	Explain the current model of DNA replication and describe the different repair mechanisms that can correct mistakes in DNA sequencing including the mechanisms of biotechnology and bioinformatics.		54
17	Describe the mechanisms by which genetic information flows from DNA to protein, to include the Central Dogma: transcription, RNA processing and translation		54-55
18	Describe the mechanisms by which genetic information flows from DNA to protein, to include the Central Dogma: transcription, RNA processing and translation		54-55
19	Analyze a simulated strand of DNA to determine the genetic code and base pairing of DNA		46
20	Describe the mechanisms by which genetic information flows from DNA to protein, to include the Central Dogma: transcription, RNA processing and translation		52
*	Questions might appear in a different order in the actual exam, or on the exam paper.		
**	As it appears in the textbook, and LMS.
