- D) look nothing like a rose

Correct Answer

B) look similar to its parent

6) Fill in the blanks using the available answer choices.

Inherited traits come from _____ .
(Blank 1)

Blank 1 options

- one parent
- both parents

Correct Answer

both parents

Answer Key with Questions

Plant Traits- Review

7) What is one way that pine trees might be different from each other?

- A) They don't look like their parents.
- B) Some have a different life cycle.
- C) They don't have the same number of pine needles.

Correct Answer

C) They don't have the same number of pine needles.

Passage 1

8) Marisol wants to show that plants need sunlight in order to grow. She plants one plant in a terrarium with soil. Then she puts the terrarium in a sunny room. Marisol makes a second terrarium for the next part of her experiment. What should she do differently with the second terrarium?

- A) She should put it in a dark room.

Reason: Key. To show that plants need sunlight to grow, one terrarium should be placed in sunlight and one should be without sunlight. In this case, no other variable was changed. This would allow for a fair comparison to be made in order to show the effect of sunlight on plant growth.

- B) She should use another kind of soil.

Reason: To show that plants need sunlight to grow, one terrarium should be placed in sunlight and one should be without sunlight. No other variable should be changed. Using a different kind of soil would not allow for a fair comparison to be made.

- C) She should place it under a bright light.

Reason: To show that plants need sunlight to grow, one terrarium should be placed in sunlight and one should be without sunlight. In this case, the second terrarium was placed under a bright light. This would not allow for a fair comparison to be made.

Correct Answer

A) She should put it in a dark room.

Answer Key with Questions

Plant Traits- Review

9) Which of these explains a variation in an inherited trait?

- A) A plant parent with a white flower produces an offspring plant with a yellow flower.
- B) A parent bush has thorns and the offspring bush has thorns.
- C) A plant has wilted leaves when it receives less water.
- D) A plant has greener leaves when it is fertilized.

Correct Answer

A) A plant parent with a white flower produces an offspring plant with a yellow flower.

Answer Key with Questions

Plant Traits- Review

10) What are three inherited traits of the plant in the picture?

- A) type of root, flower color, leaf shape
- B) stem height, depth of soil, flower shape
- C) leaf shape, flower color, amount of rainfall
- D) amount of sunshine, leaf shape, type of root

Correct Answer

A) type of root, flower color, leaf shape

Answer Key with Questions

Plant Traits- Review

11) A peach tree has an offspring. Which trait is a variation of an inherited trait from the parent tree?

- A)** height
- B)** leaf shape
- C)** type of fruit
- D)** color of flower

Correct Answer

C) type of fruit
