*** Read the text and answer the questions:**

Fleas and crickets are both tiny creatures, but they have some differences. Fleas are very small insects that like to live on animals, such as dogs and cats. They can jump really far and move quickly on their legs. Fleas don't have wings, but they have special legs that help them jump. Sometimes, if a pet has fleas, they might make them itchy. It's important to keep our pets clean to help keep fleas away! On the other hand, crickets are insects that make chirping sounds. They have long antennae and wings that help them jump and fly. Crickets like to live in grassy areas and can be found outside. They are often seen at night because they are nocturnal, which means they are most active when it's dark. Crickets don't usually bother people or pets like fleas do.

1. What are fleas and crickets?

- A. big animals.
- B. tiny creatures.
- C. flying insects.

2. Where do fleas like to live?

- A. in trees.
- B. on animals.
- C. in the water.

3. When are crickets most active?

- A. during the day.
- B. in the morning.
- C. at night.

4. Where do crickets like to live?

5. How do fleas move?

*** Read the text and answer the questions:**

Bees are amazing insects! They are small and fuzzy with black and yellow stripes. Bees live together in big groups called colonies. They live in hives. Inside the hive, there are three types of bees: the queen, the worker bees, and the drones. The queen bee is the most important bee in the hive. She lays eggs. Worker bees are the busiest bees. They collect nectar and pollen from flowers to make honey and feed the colony. Bees are excellent flyers. They have four wings that help them move quickly from flower to flower.

- 1. What colour are bees? (green and blue - black and yellow - red and purple).
- 2. Where do bees live together? (in nests - in hives - in trees).
- 3. Who is the most important bee in the hive? (worker bee - drone - queen bee).
- 4. What do worker bees collect from flowers? (water - nectar and pollen - leaves).
- 5. How many wings do bees have? (two wings - four wings - six wings).
