B- Read the text. Complete the sentences by choosing the correct words from the text bank. There are two words you do not need

A long time ago, people used their hands, arms, and fingers to measure how tall or wide things were. For example, a chair might be 2 arms and 5 fingers high. Today, we use rulers to measure instead. In our classroom, we measured the height of a triangle, and it was 30 cm. We also measured the width of a square, and it was 20 cm. Measuring helps us know the right size of things.

high	hands	triangle
ruler	well	chair

1. A _____ is 2 arms and 5 fingers high.
2. We can use a _____ to find out the size of things now.
3. The shape with three sides was measured to be 30 cm _____.
