Part 3A: Reading — 24 marks (3 each)

Read the test and choose the correct answers. Choose A, B or C

Identity in the Digital Age

Today, many young people have two identities: one in the real world and another online. On social media, you can choose your photo, your name and the things you share. This gives you a chance to express your interests and to meet people with the same hobbies. However, it can also create problems. Some people show only the best parts of their lives, such as holidays, new clothes and exciting parties. When others see these posts, they may feel that their own lives are boring. Researchers say that comparing yourself with other people online can reduce your self-confidence. In addition, some people pretend to be someone else because they want to be popular. This is dangerous because it is difficult to know who you are talking to. So, how can you protect your identity online? First, think carefully before you share personal information such as your address or school. Second, remember that nobody's life is perfect, even if it looks perfect on a screen. Third, choose to spend time with friends face to face as well. Finally, be yourself. Your real qualities, such as kindness, honesty and creativity, are more valuable than the number of followers you have. The best way to build a strong identity is to be proud of who you really are, both online and offline.

1. **What can you choose on social media?**
   - **A.** Your teachers
   - **B.** Your home
   - **C.** Your photo, name and the things you share
2. **How may people feel when they see other people's perfect posts?**
   - **A.** Very happy
   - **B.** That their own lives are boring
   - **C.** Tired
3. **Why is pretending to be someone else dangerous?**
   - **A.** It is expensive
   - **B.** It is slow
   - **C.** It is difficult to know who you are talking to
4. **What should you think carefully about before sharing?**
   - **A.** Your favourite colour
   - **B.** Personal information such as your address or school
   - **C.** Your hobbies
5. **What can reduce your self-confidence?**
   - **A.** Reading books
   - **B.** Playing sports
   - **C.** Comparing yourself with other people online

6. **What is more valuable than the number of followers you have?**
   - **A.** Real qualities such as kindness, honesty and creativity
   - **B.** Money
   - **C.** New phones
7. **In the text, the word pretend means _____.**
   - **A.** act as if something is true when it is not
   - **B.** tell the truth
   - **C.** forget
8. **What is the text mainly about?**
   - **A.** Social media is always bad
   - **B.** How to keep a strong, real identity online and offline
   - **C.** How to get more followers

Part 3B: Reading — 16 marks (2 each)

Read the text and choose the correct answer. Choose A, B or C

The Northern Lights

The Northern Lights, also called the aurora borealis, are one of the most beautiful natural wonders. They look like moving curtains of green, pink and purple light in the night sky. People can see them in places near the Arctic Circle, such as Norway, Iceland and Canada. For many centuries, people created stories to explain the lights. Some believed they were spirits, and others thought they were reflections from the ice. Today, science can explain them. The Sun sends out a stream of tiny charged particles, which travel through space towards the Earth. Our planet has a magnetic field that guides these particles towards the North and South Poles. When they hit gases in the atmosphere, they release energy as light. Oxygen produces green and sometimes red light, while nitrogen produces blue and purple. The lights are strongest when the Sun is very active. Scientists can now predict these events, so tourists can plan trips to see them. The best time to watch is on a clear, dark night between September and March, far from city lights. If you ever see them, take warm clothes and a camera, because you may need to wait for hours.

1. **What colours do the Northern Lights have?**
   - **A.** Only red
   - **B.** Green, pink and purple
   - **C.** Black and white
2. **Which gas produces blue and purple light?**
   - **A.** Oxygen
   - **B.** Iron
   - **C.** Nitrogen
3. **When is the best time to watch the lights?**
   - **A.** On a cloudy afternoon
   - **B.** On a clear, dark night between September and March
   - **C.** In the middle of a city
4. **In the text, the word predict means _____.**
   - **A.** say what will happen in the future
   - **B.** forget
   - **C.** draw
5. **In the text, the words a stream of mean _____.**
   - **A.** a small boat
   - **B.** a continuous flow of
   - **C.** a piece of
6. **What will probably happen to the lights when the Sun becomes more active?**
   - **A.** They will disappear
   - **B.** They will become stronger
   - **C.** They will turn black

Part 4: Writing

40 marks total

1.1 The Moon

The Moon is Earth's only natural satellite, and it is about 384,000 kilometres away. It is much smaller than Earth, and its gravity is only one sixth as strong. This is why astronauts could jump so high when they walked on its surface in 1969. There is no air on the Moon, so there is no wind, no weather and no sound. During the day, the temperature rises to over 100 degrees Celsius, but at night it falls below minus 150. The surface is covered with grey dust and thousands of craters, which were made by rocks from space. Today, scientists want to build a research base on the Moon. They believe that there may be frozen water in some of the craters, and this water could provide drinking water and oxygen for future visitors. A base on the Moon could also be a starting point for missions to Mars.

Write the main ideas of the text in your own words (3–4 sentences):
