Famous Modern Explorers

Today, explorers travel to places that are very difficult to reach. Jacques Cousteau was a French explorer who loved the ocean. He used special cameras to film fish, sharks and coral under the sea. His films showed millions of people a new world.

Another famous explorer is Sarah Marquis from Switzerland. She walked alone for three years across Asia to Australia. She carried food, water and a small tent.

Exploring has changed a lot. Long ago, explorers used paper maps and a compass to find their route. Today, they use satellites and GPS on their phones. Modern explorers also have strong boots and warm clothes.
