Mock Exam

Part 1: Vocabulary – Multiple-Choice Gap Fill

Choose the correct word(s) to complete the sentences. Choose A, B, or C.

1. Last night's sudden _____ caused a lot of damage, and the loud thunder kept everyone awake.

A) autumn B) storm C) percent

2. Instead of staying home, my brother likes to spend his time outdoors doing _____ like football and swimming.

A) degrees B) stories C) activities

3. Scientists are deeply worried about _____ warming because it causes glaciers to melt rapidly.

A) global B) extreme C) sunny

4. If you divide a pizza equally into four pieces, each piece is called a _____.

A) none B) quarter C) half

5. During the summer _____, we usually travel to the coast to enjoy the beach.

A) wind B) homework C) season

Part 2: Grammar – Multiple-Choice Gap Fill

Read the text and choose the correct word(s) to complete the sentences.

Most of us eat breakfast early in the morning, but my brother always prefers (1) _____ until 9:00 AM. He says it helps him stay healthy. Yesterday, while he (2) _____ his morning meal, he accidentally spilled orange juice all over his laptop. Usually, he is very careful, so he (3) _____ makes mistakes like that. Because of the accident, he (4) _____ a new laptop tomorrow afternoon. He needs it urgently (5) _____ he has an important university project to finish by Friday.

- | | | |
|-----------------|------------|---------------|
| 1. A) waiting | B) to wait | C) waited |
| 2. A) is eating | B) eats | C) was eating |
| 3. A) always | B) rarely | C) regularly |
| 4. A) will buy | B) bought | C) buys |
| 5. A) because | B) so | C) but |

Part 3A: Reading

Read the text. Choose True, False, or Not Given for each statement.

The Midnight Storm

Last Tuesday night, a powerful and unusual storm hit the small coastal town of Greenbay. The weather report had predicted light rain, so the extreme wind and heavy rainfall caught the residents completely by surprise. Within just two hours, the town's main streets were completely flooded, turning roads into fast-moving rivers.

Local meteorologist Sarah Jenkins stated that the rapid drop in temperature created an unstable atmosphere, which triggered the hurricane-like winds. Many old trees were uprooted, and several houses lost their roofs. Fortunately, because it happened late at night, most people were safe inside their homes, and no serious injuries were reported. Emergency services worked through the night to clear the debris and help families move to safer ground. By Wednesday morning, the storm had passed, leaving behind a massive cleanup task for the community.

Statements:

1. The people living in Greenbay expected a massive storm to hit their town.

A) True B) False C) Not Given

2. The heavy rainfall caused the streets of the town to fill with water.

A) True B) False C) Not Given

3. Sarah Jenkins works for the local television news station.

A) True B) False C) Not Given

4. The storm caused many old trees to be pulled out of the ground.

A) True B) False C) Not Given

5. Many residents were hurt during the storm because they were outside.

A) True B) False C) Not Given

6. The entire text is mainly about how a local meteorologist studies the weather.

A) True B) False C) Not Given

Mr. Hossam Ali

Part 3B: Reading

Read the text. Choose the correct answer. Choose A, B, or C.

The Secrets of Petra

The ancient city of Petra, located in Jordan, is one of the most famous places in the world. Carved directly into vibrant red and pink sandstone cliffs, it is often called the "Rose City". It was built thousands of years ago by the Nabataeans, a hard-working nomadic people who turned this desert area into a major trading hub for spices and silks.

To enter Petra, visitors must walk through the Siq, a narrow and dim gorge that stretches for more than a kilometer. At the end of this dark path, the magnificent Treasury building suddenly appears, leaving travelers amazed by its detailed architecture. The Nabataeans were also excellent engineers. They constructed an advanced water system that gathered and stored scarce rainfall, allowing a large population to survive in the middle of a dry desert. Today, millions of tourists visit Petra annually to see this incredible wonder.

Questions:

1. Why is the ancient city of Petra known as the "Rose City"?
 - A) Because the people grew roses everywhere.
 - B) Because it is located near a famous rose garden.
 - C) Because it was built inside colorful pink and red stone cliffs.

2. Who were the Nabataeans according to the passage?
 - A) Nomadic traders who built the city long ago.
 - B) Modern tourists visiting Jordan.
 - C) Roman soldiers who conquered the desert.

3. The Siq is described as a path that is:
 - A) short and wide
 - B) bright and modern
 - C) long and narrow

4. The word scarce in the second paragraph means:

- A) very small in amount
- B) clean and fresh
- C) completely dangerous

5. What did the Nabataeans build to help them live comfortably in the dry desert environment?

- A) Giant hotels for international tourists.
- B) Large markets to sell pink sandstone.
- C) Advanced systems to collect and save water.

6. What is the main point of the second paragraph?

- A) To explain how spices were traded across Asia.
- B) To describe the experience of entering Petra and its water engineering.
- C) To argue that Petra is too crowded with tourists.

7. What is the author's primary purpose in writing this text?

- A) To compare Petra with other modern cities.
- B) To give information about the history and features of Petra.
- C) To convince people to move and live in Jordan.

Part 3C: Reading

Read the text. Choose the correct answer. Choose A, B, or C.

Extreme Weather Report: The Atacama Dilemma

The Atacama Desert is widely recognized as one of the driest places on Earth, where decades often pass without a single drop of rain. The extreme lack of moisture shapes everything about this region, creating a landscape that looks more like Mars than Earth. However, meteorologists have recently noticed unusual weather shifts that are changing the mood and environment of this hyper-arid zone.

Last month, an unexpected weather pattern brought heavy downpours to parts of the desert. While a sudden rainstorm might seem like a wonderful event, it actually created severe issues. The local ecosystem is perfectly adapted to dry conditions, so the sudden water caused mudslides and disrupted native wildlife. On the other hand, the rain also triggered a rare phenomenon known as the "blooming desert," where millions of hidden seeds suddenly burst into colorful flowers, completely altering the local atmosphere. This drastic change shows how unpredictable global weather patterns have become, leaving scientists eager to study how these habitats will react over time.

Questions:

1. What makes the Atacama Desert unique compared to most other places on Earth?

- A) It is incredibly dry and can go decades without rain.
- B) It receives heavy rainfall every single month.
- C) It is covered in thick green forests and plants.

2. How did the recent heavy rainstorm affect the local desert ecosystem?

- A) It permanently ruined the landscape so nothing can grow.
- B) It caused issues like mudslides and disrupted the local wildlife.
- C) It made all the native animals leave the desert forever.

3. The text mentions that the desert landscape looks similar to:
- A) the planet Mars
 - B) a tropical island
 - C) a modern city park
4. The word phenomenon in the second paragraph refers to:
- A) a type of dangerous desert animal
 - B) a tool used by scientists to measure rain
 - C) an unexpected or remarkable event
5. What happens during the "blooming desert" event?
- A) The sand turns dark and completely disappears.
 - B) Strong winds destroy the remaining desert plants.
 - C) Millions of buried seeds grow into colorful flowers.
6. What is the main point discussed in the second paragraph?
- A) The mixed consequences of the unexpected rainfall on the desert.
 - B) The specific types of scientists who enjoy traveling to deserts.
 - C) The history of how the desert was originally formed.
7. What is the overall meaning of the entire passage?
- A) Weather patterns are stable, and deserts never experience shifts.
 - B) The Atacama Desert is becoming an ideal place for agricultural farming.
 - C) Sudden, unusual weather changes can significantly impact even the driest environments.
