Activity 2 Reading

Read about Eva Valicsek's design.
What materials did she use?

She used cardboard and a rubber band to make the egg carton.

Egg carton of the future

Hungarian design student, Eva Valicsek designed the egg carton of the future. It is made of cardboard and a rubber band.

"At the start, I wanted to design a box for different egg sizes," she says. She made a lot of models to find the right design. Then she made the best design with a rubber band. Eva's carton is easy to make and it can hold both small and large eggs. The rubber band and the cut-out holes stop the eggs from moving. The top is open so you can see the eggs. The egg carton is environmentally friendly because it can be reused many times.
