## **WRITING 2 Problem / Solution**

### **Fixed Essay**

.....is major problem around the world, it effects a huge number of people negatively, therefore, it is important to look for solutions to help reduce the bad effects of it. In this essay, I will mention some causes and possible solutions to this problem.

To begin with, people have a major part in this problem, as they enable it to proceed without attempting to stop it. Collaboration would play a huge role in reducing the negative aspects of this problem.

Also, social media could cause some harm when it comes to ....., as people might spread and believe false information. It is important that people use social media in the right way, for example to spread awareness about the problem.

Last but not least, some rules are outdated and do not suit our modern time. The responsible authoritative party should mend the rules to help solve this problem and reduce its effects, as well as keep up with the current times.

In conclusion, .....is a serious problem, but it can certainly be overcome if we all work together. By taking simple effective steps and attempting to apply these recommended solutions, we can surely have hope for the future.

=====

### **Fixed Essay**

#### **Product**

Last week I was scrolling on my phone and came across..... that was on sale. I have been thinking about buying it for a while, and now that it was on sale, I decided to buy it. I'm glad I made that decision.

There are many things I like about my new..... First, it's very practical, compared with my old..... I see a huge difference. Secondly, my new .....is very easy to use, it did not take me long to figure out how to use it correctly. The final good point is the price, as I got it on sale, it was such a good deal compared to its real price.

Although I like my .....a lot, there are few things that I don't like about it. Firstly, this product does not come in different colours like it used to, so there's a lack of options and I think the colour available might not suit all people. Also, the product was made from materials that are not environment friendly, and I felt they could have used alternatives for these materials. Finally, the original price without the sale is a bit too high, most people might not be able to afford it.

Overall, the .....was great, and I definitely recommend them, in fact, once it's on sale again, I will buy one for my sister!

## **Fixed Essay Service**

Last week I was scrolling on my phone and came across a place that had discounted prices for..... . I have been thinking about getting this service for a while, and now that it was discounted, I decided to try it. I'm glad I made that decision.

There are many things I like about this service. First, it's easily booked, compared to the old place I used to go to, so I see a huge difference. Secondly, the staff were very welcoming and friendly, they did not hesitate to offer help and answer any questions I had. The final good point is the price, as I paid the discounted price, it was such a good deal compared to its real price.

Although I liked the results, there are few things that I don't like about it. Firstly, the place doesn't provide parking, and with this humid weather, it is hard to walk for long. Also, the waiting line was a bit too long, even though I booked in advance. Finally, the original price without the discount is a bit too high, most people might not be able to afford it.

Overall, getting .....service was great, and I definitely recommend the place, in fact, once it made discounts again, I will go again with my sister!

## **WRITING 4 Comparing and contrast**

### **FIXED ESSAY**

\_(1)\_and\_(2)\_ are important in almost everybody's life, they are considered a necessity in modern times, and although\_(1)\_and\_(2)\_ may look similar in many ways, they are still different on so many levels. In this essay, I will discuss the similarities and differences between\_(1)\_and\_(2).

To begin with, both (1) and (2) play a crucial role in a person's life and future, they provide the needed help and benefits that is vital for development, especially for young adults. Also, both (1) and (2) are practical and they fit well into a person's modern life. Finally, both\_(1)\_and\_(2)\_ provide structure and a sense of reassurance.

However, there are many differences between (1) and (2) some people might consider\_(1)\_ to be better, and they prefer it over\_(2)\_ while some people think the opposite, as there had been a disagreement over their utility. Also, (1) is more popular than\_(2). Finally, in contrast to (1),(2)\_ is more accepted worldwide than\_(1).

In the end, both \_(1)\_and\_(2)\_ have a lot of similarities, but that does not erase their differences. Recognizing the similarities and differences can help a person decide what suits them best and it can help them recommend what's best for others.

## **WRITING 2 Problem / Solution**

### **Model Essay**

Water scarcity is a major issue around the world, affecting millions of people and causing problems with farming, health, and economies. To effectively tackle this growing problem, everyone needs to contribute. Individuals, companies, and governments must all take action to save water.

To begin with, individuals have a significant role to play in this effort. Every person can help conserve water by making small changes at home. For instance, fixing leaks and installing water-efficient appliances can lead to substantial water savings. These actions may seem small, but when many people adopt them, the overall impact on water conservation can be enormous.

On the corporate side, businesses, especially those that use a lot of water, need to take responsibility too. Companies can adopt new technologies that minimise water use and find innovative ways to recycle water. By doing this, they not only save water but also set a positive example for others in their industry to follow, promoting sustainability on a larger scale.

Last but not least, governments can make a major impact by implementing policies that encourage water conservation and by investing in infrastructure improvements. Effective policies can ensure that water is used more efficiently across all sectors. Additionally, governments can motivate individuals and businesses to adopt water-saving practices by raising awareness and offering incentives like tax reductions.

In conclusion, although water scarcity is a serious challenge, it is one that can be overcome if we all work together. By taking simple yet effective steps at home, supporting businesses that prioritise water conservation, and endorsing strong national initiatives, we can ensure that there is enough water for everyone, both now and in the future.

### **Model Essay**

#### **A Review of My Trainers**

Recently I was shopping online, and I saw a pair of trainers on sale. Usually, I read reviews before I buy anything online. However, in this case, I just decided to buy them because I needed new trainers. The price was low, and there was only one pair left in my size. On the whole, I'm glad I made that decision.

There are several things that I especially like about shoes. First, they're really light. Compared with my old shoes, the new ones weigh about half as much. This means my legs feel less tired after a workout. In addition, they're better for the environment than other shoes. I didn't know this when I bought them, but they can apparently be recycled easily because they were made using a "cradle-to-cradle design process." The final good point is the price. I got them for just BD 6.2, and good trainers are usually not as cheap as that. In fact, it's probably the best price I've ever paid for quality shoes.

Although I like shoes a lot, there are two things that I find less appealing. First, the shoes are not as stylish as I would like. They have a really bright, colorful design, but I would prefer a simpler style and darker

colours. Because the design is so bright, people often ask me where I got them. At first, I thought this was funny, but it's becoming more frustrating now because it happens almost all the time. Second, I was disappointed that the shoes were wrapped in plastic inside the box. These shoes are supposed to be good for the planet, so I feel the plastic wasn't needed.

Overall, the shoes are great, and I definitely recommend them. In fact, I'm going to buy another pair, though I'll look for a less colourful pair next time!

## **WRITING 4 Comparing and contrast**

### **MODEL ESSAY**

#### **Two Different Experiences**

Secondary school and college serve as pivotal stages in our life. For most of us, these two institutions hold a very special position in our hearts. Who doesn't love school or college these days? In fact, although secondary school and college may look similar in many ways, they do offer completely different experiences.

To begin with, both secondary school and college play crucial roles in shaping a person's future. They provide a structured curriculum that includes a variety of subjects, which are essential for acquiring a broad knowledge base. Additionally, both environments encourage social interaction and extracurricular activities, allowing students to develop interpersonal skills and explore interests beyond the classroom.

However, the differences between secondary school and college are quite pronounced. Secondary school typically has a more rigid schedule and stricter oversight, with teachers closely monitoring students' progress. In contrast, college offers greater autonomy, with students being responsible for managing their time and learning. The teaching style in college also tends to be more learner-focused, promoting extensive research and self-study, as opposed to the often textbook-based approach in secondary school and the focus on developing general knowledge and skills.

In conclusion, while secondary school and college share the common goal of educating students, they differ in their approach to teaching, level of independence granted to students, and overall learning atmosphere. Recognising these similarities and differences can help students transition smoothly from one stage to the next and make the most of their educational experiences.

## **Eng. 201 Unit (2): Writing a problem solution essay about plastic waste**

It is a fact that plastic waste has become a major environmental problem. Many academic studies have discussed (explored) this issue (phenomenon). One estimate (study) says that around eight million tons of plastic enter the oceans every year. This is a problem because plastic waste looks unattractive. In addition, small bits of plastic can get into the bodies of fish, birds, and animals and make them sick. In order to solve these issues, individuals, companies, and governments all need to take action. In this essay, I explore the problem of plastic waste and highlight some effective solutions that can help control it.

To begin, some people might argue that the actions of individual people will not affect plastic waste much. In my view, however, people can definitely help if they follow these three rules. First, they should reduce how much plastic they use. This means they can buy products that come in glass or metal, not plastic. Second, people can also reuse plastic products. For example, large plastic bottles are perfect for storing things. Third, people can recycle plastic products and reuse them again. This will surely be great help to the environment.

In addition, companies can also help solve the problem of plastic waste. To illustrate, they could make products from other materials, such as glass or metal, instead of plastic. Besides, they could stop using plastic to wrap the items they make. In my experience, many things that people buy have a lot of excess plastic around them, so this approach would definitely reduce plastic waste.

Finally, (Moreover,) governments can help deal with the issue of plastic waste. In particular, they could encourage companies and individuals to use less plastic. Add to this, they could ban plastic shopping bags and require stores to charge a small fee for paper ones. Additionally, governments could raise taxes for companies that use a lot of plastic and reduce taxes for companies that use other materials.

In conclusion, it is evident (clear) that the plastic waste dilemma (problem) is really daunting (complex), but it is not undefeatable (unbeatable). I strongly believe that through the joint actions of individuals, companies, (businesses), civil organisations and policymakers, we can contain (control) this environmental menace (threat). The journey towards a cleaner planet requires each of us to take part in fostering a healthier, safer, and more sustainable future.

## **Eng. 201 Unit (3) Writing a review about my new (AI) app**

Recently, I was browsing online, and I saw an (AI) app on sale. Usually, I read reviews before I subscribe to any software. However, in this case, I just decided to go for it because I needed a new (AI) tool, the price was low, and it offered exactly the features I needed. On the whole, I'm glad I made that decision.

There are several things that I especially like about the app. First, it's really user-friendly. Compared with other tools I've used; this one is much easier to navigate and deal with (utilise). This means I spend less time figuring things out and more time working. Additionally, it's better for data security than other apps. I didn't know this when I subscribed, but it apparently uses the latest encryption methods because it was designed with privacy in mind. The final good point is the price. I got it for just \$10 a month, and good (AI)

tools are usually not as cheap as that. In fact, it's probably the best price I've ever paid for such apps (functionality).

Although I like the app a lot, there are two things that I find less appealing. First, the app is not as reliable as I would like. It tends to crash unexpectedly, and I would prefer a more stable performance. Because it crashes sometimes, it can be quite frustrating when I'm in the middle of something important. In the beginning, I thought this was a minor issue, but it's becoming more annoying now because it happens almost all the time. Second, I was disappointed with the customer support service. This app is supposed to offer efficient problem-solving, so I feel the slow response times weren't needed.

Overall, the app is great, and I definitely recommend it to anyone. In fact, I'm going to keep my subscription, though I hope for some improvements in reliability and customer service next time!

#### **Eng. 101 Unit (4) Compare contrast essay about shopping online and in shops**

Shopping is an integral (essential/important) part of our daily life, evolving from traditional in-store shopping to the online platforms. While both methods aim to fulfil consumer needs and wants, they each offer unique experiences and benefits. Understanding the similarities and differences between online shopping and in-store shopping can help consumers make better choices about where and how they spend their money.

Both online and in-store shopping share the fundamental goal of providing goods and services to consumers. Whether browsing websites or walking through a mall, shoppers can explore a wide range of products, from clothing and electronics to groceries and household items. Both methods also offer sales, discounts, and promotions to attract customers and boost sales. Furthermore, customer service plays a crucial role in both experiences; online shopping often includes live chat support and detailed product descriptions, while in-store shopping provides personal interactions that can offer immediate assistance and advice.

Despite these similarities, online and in-store shopping differ significantly in terms of experience and convenience. Online shopping offers unparalleled convenience. For example, it allows consumers to shop 24/7 from the comfort of their homes. People do not need to travel, so it reduces time spent in moving from one shop to another and people avoid waiting in long queues. However, online purchases often require waiting for delivery, which can be delayed. In contrast, in-store shopping provides instant gratification, with customers able to take their purchases home immediately. Additionally, in-store shopping allows for physical interaction with products—trying on clothes, testing electronics, or inspecting the quality of goods, which can be crucial for certain types of purchases. On the other hand, online shopping includes extensive reviews and ratings from other customers, offering insights that in-store shopping may lack.

In conclusion, both online and in-store shopping have some advantages and challenges. While online shopping offers convenience (comfort) and a broad range of products with just a few clicks, it lacks the immediacy, (face to face) enjoyable experience provided by in-store shopping. Conversely, traditional shopping offers the benefit of immediate ownership and the ability to physically assess

products but can be time-consuming and less convenient (comfortable) in today's fast-paced world. Ultimately, the choice between online and in-store shopping depends on individual preferences and specific shopping needs. In my opinion, recognizing these similarities and differences can help people enjoy the best shopping experience and get the best prices for the quality goods.

#### **Eng. 101 Unit (4) Compare contrast essay about eBooks and printed books**

Books have been and still is a cornerstone of human knowledge and culture for centuries, evolving (developing) from printed books to electronic books (eBooks). There is an ongoing debate between the merits of eBooks and printed books. Many academic studies have discussed the different aspects of this topic. This essay explores the similarities and differences between eBooks and printed books, aiming to provide a comprehensive understanding of their respective roles in modern reading.

On the one hand, the first aspect of similarity is that both eBooks and printed books share the purpose of conveying information, telling stories, and providing entertainment. In addition, they serve as vehicles for authors to share their ideas and for readers to explore new worlds and learn new things. In other words, whether in electronic or printed form, books offer a way to preserve (keep) knowledge, culture, and history for future generations. Moreover, people have become familiar with both of them due to the spread (popularity) of electronic devices like mobile phones, laptops, computers and iPads even if children and young men are more interested in using eBooks.

However, there are some undeniable differences between eBooks and printed books. To begin with, one of the primary advantages of eBooks is their convenience. eBooks can be stored on digital devices such as eReaders, tablets, and smartphones, allowing readers to carry an entire library in their pocket. This makes it easy for readers to access their books anytime and anywhere. Moreover, eBooks come with features like adjustable font sizes and built-in dictionaries. This enhances the reading experience for many users. Another significant difference is that printed books offer a sensory experience. The warm feelings of holding a book, the smell of the paper, and the act of turning pages contribute to a unique and immersive reading experience. Many readers feel more enjoyment and connection to the printed books. Another difference is that printed books do not require batteries or electronic devices. This makes them reliable and accessible without the need for technology. Many people believe that printed books are easier to use and more comfortable. In contrast, for many people eBooks can be purchased and downloaded instantly, often at lower prices than the printed books. They are also more environmentally friendly, as they do not require paper, ink, or transportation. Conversely, printed books support local bookstores and libraries, fostering community engagement and ensuring that reading materials are available to those who may not have access to digital devices or the internet.

In conclusion, it is evident that both eBooks and printed books have unique advantages. eBooks offer unmatched convenience and accessibility, while printed books provide a sensory and reliable reading experience. In my opinion, the choice between eBooks and printed books depends on individual preferences. As technology continues to evolve (develop), the coexistence of both formats ensures that the joy of reading remains varied and accessible to everyone.

## **Comparing and contrasting two important cities in Bahrain: Manama and Muharraq**

Manama and Muharraq are two important cities in Bahrain. Each of them has its own special (unique) features (characteristics) and history. These two cities hold a great value in the hearts and minds of all Bahraini people. In fact, although Manama and Muharraq may look similar in some ways, they are different in some other sides. In this essay, I explore some similarities and differences between Manama and Muharraq.

To begin, Manama and Muharraq are neighbouring cities. Manama is the current capital of Bahrain, and it is on the northeastern tip of Manama Island, and it is the largest city in Bahrain and serves as the political, economic, and cultural centre. Muharraq was the old capital. It is smaller in size, and it is located on Muharraq Island in the northeast of Manama. In addition, Manama and Muharraq has the biggest percentage of population. Yet, Manama has a larger number of people living in it. About 250,000 people live in Manama, and nearly 150,000 people live in Muharraq. The population of Manama is with a mix of a few Bahraini people and many expats, mainly from India, Bangladesh, Pakistan, Philippines and other Arab countries.

It is a fact that Manama is more crowded. It is a modern city with a different lifestyle. Manama also has many tourists who spend their time in hotels, cafés, restaurants, shopping malls and cinemas. This makes it more vibrant and multicultural. The lifestyle is more open in Manama, compared to Muharraq which has a higher number of native Bahrainis who help to preserve traditional Bahraini culture. Muharraq has a more relaxed lifestyle with Islamic customs and traditions. Manama is the economic centre of Bahrain, with many banks, government offices, and international companies. Muharraq is known for its role in aviation, with Bahrain International Airport located there.

Both Manama and Muharraq have tourist activities and Historical sites and many tourists come to visit these two cities, especially in winter and spring. Manama attracts millions of tourists from different nationalities for its modern attractions, such as Bahrain National Museum, Bahrain fort, and shopping malls like, Avenues, City Centre and Seef mall . Muharraq is also known for its historical buildings. This means Muharraq is rich in history. It has some UNESCO sites like the Pearling Path, old buildings, and Arad Fort. Muharraq offers a look into Bahrain's past historical landmarks which are still important to its culture.

In summary, it is evident that Manama and Muharraq share some elements (features), but they differ in others. They both play important roles in Bahrain's history, identity, and future. However, they differ in size, population, lifestyle, and diversity. Manama represents the country's modern side, economic centre, and government offices, while Muharraq keeps its historical roots, culture, traditions and the conservative society. In my point of view, recognising these similarities and differences between Manama and Muharraq can help to develop them. I believe they both provide a full and clear picture of Bahrain's past, present, and future.

## **1. (Exam Phobia)**

*It goes without saying that exam phobia is a serious problem that the whole world is facing now. Therefore, it is important to find solutions to overcome this problem. In this essay, I will shed some light on some of them.*

*The first solution is to implement a "no pressure" exam policy where students can retake exams if they feel unprepared. It is very important to create an environment that reduces stress because this will help students perform better. (As a result,) they will feel less anxious about their performance.*

*Another solution is to integrate technology by using apps that help students prepare for exams through gamification. Doing this will make studying more engaging. (For example,) interactive quizzes can make learning fun and effective.*

*The final solution is to organize school-wide stress relief days. Doing this will help students relax and recharge before exams. As a result, they will approach their studies with a more positive mindset.*

*To sum up, I think it is possible to rid the world of this problem. However, we need to work together regardless of age or gender.*

## **2. (Global Warming)**

*It goes without saying that global warming is a serious problem that the whole world is facing now. Therefore, it is important to find solutions to overcome this problem. In this essay, I will shed some light on some of them.*

*The first solution is to implement urban reforestation programs. It is very important to plant trees in cities because this will help absorb carbon dioxide and improve air quality. (As a result,) urban areas will become more livable.*

*Another solution is to encourage businesses to adopt a circular economy model. Doing this will make companies responsible for the entire lifecycle of their products. (For example,) promoting recycling and reusing materials can significantly reduce waste.*

*The final solution is to create incentives for individuals to reduce their carbon footprints, such as tax breaks for using public transport. Doing this will motivate people to make environmentally friendly choices. As a result, the problem will be addressed more effectively.*

*To sum up, I think it is possible to rid the world of this problem. However, we need to work together regardless of age or gender.*

### **3.(Traffic Jam)**

*It goes without saying that traffic congestion is a serious problem that the whole world is facing now. Therefore, it is important to find solutions to overcome this problem. In this essay, I will shed some light on some of them.*

*The first solution is to implement a city-wide bike-sharing program. It is very important to provide accessible bicycles for short trips because this will help reduce the number of cars on the road. (As a result,) traffic congestion will decrease.*

*Another solution is to invest in smart parking systems that guide drivers to available spots. Doing this will make parking more efficient and reduce the time spent searching for spaces. (For example,) such systems can significantly lower traffic in busy areas.*

*The final solution is to promote telecommuting for employees. Doing this will help reduce the number of commuters during peak hours. As a result, the problem will disappear gradually.*

*To sum up, I think it is possible to rid the world of this problem. However, we need to work together regardless of age or gender.*

### **4. (Plastic Waste)**

*It goes without saying that plastic waste is a serious problem that the whole world is facing now. Therefore, it is important to find solutions to overcome this problem. In this essay, I will shed some light on some of them.*

*The first solution is to promote the use of refill stations for water bottles. It is very important to encourage people to refill instead of buying bottled water because this will help reduce plastic waste. (As a result,) there will be less plastic in the environment.*

*Another solution is to establish partnerships with local artists to create art from plastic waste. Doing this will raise awareness about the issue and inspire community action. (For example,) hosting exhibitions can engage the public in discussions about sustainability.*

*The final solution is to advocate for policies that support plastic-free initiatives in schools and workplaces. Doing this will help to create a culture of sustainability. As a result, the problem will disappear gradually.*

*To sum up, I think it is possible to rid the world of this problem. However, we need to work together regardless of age or gender.*

## **5. (Mobile Phone Addiction)**

*It goes without saying that mobile phone addiction is a serious problem that the whole world is facing now. Therefore, it is important to find solutions to overcome this problem. In this essay, I will shed some light on some of them.*

*The first solution is to create "phone-free" zones in schools. It is very important to encourage students to focus on their studies without distractions. (As a result,) they will be able to concentrate better.*

*Another solution is to promote technology-free weekends. Doing this will encourage families to spend quality time together without devices. (For example,) organizing outdoor activities can help strengthen relationships.*

*The final solution is to develop apps that help users track their screen time and set limits. Doing this will make individuals more aware of their usage habits. As a result, the problem will disappear gradually.*

*To sum up, I think it is possible to rid the world of this problem. However, we need to work together regardless of age or gender.*

## **6. (Pollution)**

*It goes without saying that pollution is a serious problem that the whole world is facing now. Therefore, it is important to find solutions to overcome this problem. In this essay, I will shed some light on some of them.*

*The first solution is to implement community gardens that utilize sustainable practices. It is very important to engage residents in growing their own food because this will help reduce transportation emissions. (As a result,) communities will benefit from fresher produce.*

*Another solution is to encourage businesses to adopt green practices. Doing this will make companies more accountable for their environmental impact. (For example,) reducing packaging waste can significantly lower pollution levels.*

*The final solution is to organize educational workshops on pollution prevention. Doing this will help raise awareness about the importance of reducing waste. As a result, the problem will disappear gradually.*

*To sum up, I think it is possible to rid the world of this problem. However, we need to work together regardless of age or gender.*
