## 1. Car Dependency

More and more people rely on cars as a main means of transportation. Unfortunately, the increasing usage of cars can also be a source of many problems. Write an essay in which you highlight the advantages and disadvantages of using cars.

### Car Dependency

More people are relying on cars as their main way to get around. This trend has changed the way we live, and while it brings many advantages, it also comes with several disadvantages. This essay will explore both sides and share a personal view.

One advantage is convenience. Cars allow people to travel anytime, which is especially useful in areas with limited public transport. Running errands or going on family outings becomes easier and more flexible.

Another benefit is comfort and privacy. Driving provides a personal space, protection from weather, and more control over the journey. This is especially helpful for families and individuals with health or mobility needs.

A further advantage is independence. Cars allow people to travel without relying on others or sticking to fixed public transport schedules.

However, a major disadvantage is environmental harm. Car emissions contribute to air pollution and climate change, especially in urban areas. This also poses health risks to the public.

Another issue is traffic congestion. More cars on the road mean longer commute times, increased stress, and reduced time for work or family.

A final drawback is the high cost. Owning a car includes expenses like fuel, maintenance, insurance, and parking, which can be a financial burden.

According to a 2023 city survey, 6 out of 10 residents drive daily, even for short trips. The same study reported traffic and air pollution as top concerns among urban drivers.

In conclusion, while cars offer ease and independence, they also create environmental, economic, and social challenges. Promoting cleaner transport options can help reduce these effects.

## 2. Online Shopping

More and more people are buying what they need online. What are the advantages and disadvantages for shopping online? Write an essay discussing this statement, highlighting the advantages and disadvantages and expressing your opinion.

### Online Shopping

More and more people are buying what they need online. This essay will discuss the advantages and disadvantages of online shopping and give a personal opinion on the topic.

One advantage is convenience. Online shopping allows people to purchase items at any time without leaving home. For instance, a busy worker can order groceries in the evening instead of visiting a crowded supermarket.

Another benefit is product variety. Online platforms offer access to international brands and unique items that may not be available in local stores. This also makes comparing prices and finding better deals easier.

Additionally, online shopping supports people with mobility limitations. Elderly individuals or those recovering from illness can meet their needs without the stress of traveling to physical shops.

However, one disadvantage is the inability to inspect products before buying. For example, clothes might look different online or arrive in the wrong size, resulting in disappointment or returns.

Another drawback is the risk of delivery problems. Items may arrive late, damaged, or not as described. In some cases, high delivery fees can also increase the total cost.

A final concern is trust and reliability. Some websites may not provide accurate information or secure payment systems, leading to potential fraud.

According to a 2023 survey, although 70% of shoppers enjoy the comfort of buying online, over half reported receiving damaged or wrong items at least once.

In conclusion, online shopping offers ease, variety, and accessibility, but it also comes with risks. In my opinion, it is a helpful option if used with caution and awareness.

### 3. Part-Time Jobs for Students

Many school students take on part-time jobs during their academic years. There are several advantages, but also some disadvantages to consider. Write a discursive essay discussing the advantages and disadvantages of having a part-time job on the student. Support your arguments with evidence and examples.

#### Part-Time Jobs for Students

Many school students take on part-time jobs during their academic years. While this can be a valuable experience, it also comes with certain drawbacks. It is important to explore both the advantages and disadvantages of part-time work.

One advantage is the opportunity to gain practical skills. Students develop useful abilities such as time management, communication, and problem-solving. For example, a student working at a café learns to serve customers and handle responsibilities under pressure.

Another benefit is financial independence. Earning money allows students to support themselves by paying for school supplies, transportation, or personal needs. This experience also teaches budgeting and financial responsibility.

In addition, part-time work can boost self-confidence. Balancing work and school successfully often helps students feel more capable and independent.

Despite these benefits, part-time jobs can negatively affect academic performance. Working long hours may lead to fatigue and less time for studying, resulting in lower grades or missed assignments.

There is also the issue of reduced personal time. Students may find it difficult to participate in social events or extracurricular activities, which can impact their overall well-being.

Furthermore, part-time work may lead to burnout. Managing multiple responsibilities at a young age can cause stress and mental exhaustion.

According to a 2023 education survey, 40% of student workers said their job occasionally distracted them from academic responsibilities.

In conclusion, while part-time jobs provide valuable experience and income, they can also affect academic success. Maintaining balance is key to benefiting from both school and work.

#### 4. Friendship Dynamics

Having many friends can be a positive thing but can also be a negative thing. Write an essay discussing this topic and expressing your point of view with examples from real life.

#### Friendship Dynamics

Having many friends can be exciting, but it also brings challenges. It is important to explore both the positive and negative aspects of having a large social circle. This essay will discuss both sides and present a personal view.

To start with, one main advantage is emotional support. A wide group of friends means there's always someone to offer help or encouragement during difficult times. For example, students often form study groups during exams and relieve stress by working together.

Another significant benefit is gaining new perspectives. Friends from different cultures or backgrounds introduce fresh ideas and experiences. This exposure helps individuals grow intellectually and become more open-minded.

A further positive aspect is the sense of inclusion. Especially in school or university, having multiple social connections makes people feel accepted and less alone.

On the flip side, one common disadvantage is shallow connections. When people try to maintain too many friendships, they may struggle to form deep, meaningful bonds. Important details or emotional support may get lost in the crowd.

In addition, large friend groups often bring social pressure. Some individuals may feel the need to fit in or follow group norms, even if it goes against their personal comfort.

Lastly, managing too many friendships can be mentally draining. Constant communication and social commitments may lead to emotional fatigue.

According to a 2023 youth survey, while 65% enjoyed having many friends, 30% felt overwhelmed by the effort to maintain them.

In conclusion, although a wide circle offers variety and support, I believe a few strong friendships provide deeper, lasting value.

## 5. Extended Family Living

Living in an extended family has advantages and also can have some disadvantages. Write an essay discussing this topic and expressing your point of view with examples from real life.

### Extended Family Living

Living with extended family, where multiple generations share a home, can have both advantages and disadvantages. It's important to explore both sides to make the most of this living arrangement.

To begin with, one advantage is shared responsibilities. Family members can help with daily tasks such as cooking, cleaning, or childcare. For instance, grandparents may watch over the kids while parents are at work, reducing stress and saving money.

In addition, living together strengthens family bonds. Spending more time with relatives allows children to connect with grandparents and learn cultural traditions.

Another benefit is financial support. With more adults contributing to expenses, it becomes easier to cover rent, bills, and food, improving overall living conditions.

On the other hand, one drawback is the lack of privacy. When many people share a home, it can be hard to find quiet time or personal space.

Furthermore, conflicts may arise from different habits or values. For example, a young adult may want more freedom, while older relatives expect them to follow strict rules, leading to tension.

Lastly, limited independence can be a concern. Young people might feel restricted when older family members are involved in their personal decisions.

A 2023 housing survey found that while 60% of families appreciated the support in extended households, about 35% struggled with space and independence.

In conclusion, extended family living offers shared duties and emotional closeness but can also create conflict and limit freedom. Clear boundaries and good communication are key to making it work.

## 6. Peer Pressure

Peer pressure has advantages and disadvantages. Write a short essay discussing this topic and expressing your point of view with examples from real life. (200-250 words)

### Peer Pressure

Peer pressure, or the influence from people of the same age group, can lead to both positive and negative outcomes. Exploring both sides helps us understand its impact, especially among teenagers.

To begin with, one advantage is motivation. Positive peer influence often inspires people to do better. For instance, a student may start studying harder after seeing close friends perform well in school.

Additionally, peer pressure can create a sense of belonging. Being part of a group helps individuals feel accepted and confident. For example, a teenager who joins a school club with friends may feel more socially connected.

Moreover, peer groups can promote healthy habits. For instance, if most friends are committed to sports and fitness, others may be encouraged to follow similar routines.

Nevertheless, peer pressure also has its downsides. One issue is the need to conform. For example, a person might hide their true interests to match the group's preferences.

Furthermore, it can lead to risky behavior. In some cases, teens may start using bad language or lying to teachers because their friends do so.

Lastly, it may cause emotional strain. Constantly trying to fit in or meet group standards can create anxiety. For instance, comparing oneself to more popular or wealthier peers may lead to low self-esteem.

A 2022 youth study found that 70% of teens experienced peer pressure, and 40% admitted they regretted choices made under its influence.

In conclusion, while peer pressure can be supportive, it can also lead to negative choices. Being selective about friends and staying confident in one's values is crucial.

## 7. Fast Food Consumption

Eating fast food has advantages and disadvantages. Write a short essay discussing this topic and expressing your point of view with examples from real life. (200-250 words)

### Fast Food Consumption

Eating fast food has become a regular part of life for many people, especially teenagers. While it offers certain advantages, it also presents serious drawbacks. This essay will explore both sides and present a personal opinion.

First of all, the main advantage of fast food is convenience. It is quick and easy to access, especially for students and working parents. For example, my friend often grabs a burger between school and football practice because it saves time.

Moreover, fast food is affordable. It usually costs less than eating at restaurants, making it a practical choice for families on a limited budget.

In addition, fast food offers variety. From sandwiches to salads, these restaurants provide options that can satisfy different tastes.

On the other hand, a major disadvantage is its impact on health. Many fast foods are high in fat, sugar, and salt, which can lead to obesity and heart problems if consumed regularly.

Furthermore, it encourages unhealthy eating habits. People, especially teens, may grow used to processed meals and struggle to choose healthier options in the long term.

Another concern is poor nutrition. These meals often lack essential nutrients needed for energy and focus.

According to a 2023 student health survey, 70% of teens who frequently ate fast food reported feeling more tired and had difficulty concentrating in school.

In conclusion, fast food provides speed, affordability, and variety, but it can negatively affect health and long-term habits. In my opinion, it's fine in moderation, but healthy meals should be the priority.

## 8. Only Child Experience

Being the only child in a family has advantages and disadvantages. Write a short essay discussing this topic and expressing your point of view with examples from real life. (200-250 words)

### Only Child Experience

Being an only child has both advantages and disadvantages. This essay will explore these aspects and present a personal point of view on the topic.

To begin with, a key advantage is receiving full attention from parents. Without siblings, an only child often benefits from greater support and resources. For instance, parents may invest more in their child's hobbies like music or sports, leading to better opportunities for growth.

In addition, being the sole child encourages independence. With no siblings to rely on, only children learn to entertain themselves and solve problems early. A child managing their own time or making choices confidently may carry these skills into adulthood.

Moreover, many only children form a closer bond with their parents. Spending more time together strengthens emotional connection and can provide strong support during stressful times.

However, one disadvantage is loneliness. With no siblings to share experiences with, an only child might feel isolated during holidays or family events.

Furthermore, parental expectations can create intense pressure. Since all hopes rest on one child, they may feel the constant need to succeed. For example, many only children report anxiety about disappointing their parents academically.

In addition, some only children may face challenges with social development. Growing up without siblings may limit early opportunities to practice sharing or cooperating in groups.

According to a 2021 survey, 43% of only children reported feeling lonely more often than those with siblings.

In conclusion, being an only child offers focused attention and independence, but it may also bring emotional and social difficulties. Building strong friendships can help create a more balanced and fulfilling experience.

## 9. Housework Responsibility

"You should help with the housework." Write a discursive essay in response to this topic. Include these ideas: in favour and against, express your opinion and support your arguments with examples and facts.

### Housework Responsibility

The topic of helping with housework often sparks debate within families. Some believe everyone should contribute, while others think responsibilities should depend on age, workload, or role. This essay will examine both sides and provide a personal opinion.

One advantage is that housework builds essential life skills. Children and teenagers who take part in chores learn how to manage tasks they will need in adulthood. For instance, learning to cook or clean teaches responsibility and prepares them for independent living.

Another benefit is that sharing chores encourages teamwork. When tasks are divided among family members, it promotes fairness and unity. For example, families who rotate duties often report stronger bonds and better cooperation.

A further positive aspect is time management. Students who do chores learn how to balance schoolwork and home duties—an ability that is helpful throughout life.

On the other hand, students may already have busy schedules. Between school, exams, and activities, they might lack the energy or time for housework.

In addition, some believe that chores should mainly fall to adults who spend more time at home. From this view, children should focus on their education.

Another concern is stress. Extra responsibilities at home can add pressure to students already managing academic demands.

According to a 2022 study, while 70% of families felt more connected when sharing chores, over 30% of teens said housework added extra stress.

In conclusion, housework builds responsibility and unity, but tasks must be assigned fairly based on age and workload. In my opinion, all family members should help with chores, as long as responsibilities match their time and ability.

## 10.School Uniform Debate

"School Uniforms: Yes, or No". Write a discursive essay in response to this topic. Include these ideas: in favour and against opinions, express your opinion and support your argument with examples and facts.

### School Uniform Debate

"School uniforms: yes or no?" This question continues to be widely debated in many schools around the world. Supporters believe that uniforms promote fairness, focus, and a sense of discipline, while critics argue that they limit freedom, creativity, and place added financial stress on families. This essay presents both perspectives and offers a personal view.

One benefit of school uniforms is the promotion of social equality. A 2022 UK education report found that schools with uniforms experienced fewer bullying cases related to clothing and appearance.

Another advantage is improved concentration. Without the distraction of fashion trends or brand comparisons, students are more likely to focus on classroom activities and academic goals.

Uniforms also help build a stronger school identity. Wearing the same outfit each day can encourage pride, unity, and a sense of belonging within the student body.

However, some argue that uniforms reduce self-expression. Teenagers often express their individuality through their clothing, and being required to wear the same outfit may feel restrictive or impersonal.

Another concern is the cost. A 2021 U.S. parent survey showed that over 60% of families found uniforms expensive, especially when added to the cost of everyday clothing.

A final drawback is that uniforms do not guarantee improved academic outcomes or motivation.

According to a 2021 education study, academic success was found to be more strongly linked to teaching quality than to school dress policies.

In conclusion, while uniforms support unity and structure, flexible policies can balance consistency with individuality.

## 11.E-Books in Education

Using e-books in schools is a new trend. Write a discursive essay in response to this topic. Include ideas: in favour and against, your opinion and support your argument with examples and facts.

### E-Books in Education

Using e-books in schools has become a growing trend. Some believe they provide valuable benefits, while others raise concerns about their drawbacks. This essay will explore both perspectives and share a personal opinion.

To begin with, e-books are highly convenient. Students can carry thousands of digital books on a single device, avoiding the need for heavy backpacks. For example, one tablet can contain textbooks, novels, and reference materials, making access more efficient.

Moreover, e-books offer interactive features such as videos, hyperlinks, and quizzes. These tools can engage students and support different learning styles. A visual learner, for instance, might better understand a topic through embedded animations.

In addition, digital books can reduce educational costs. Schools that use e-books often save money on printing and shipping. This is especially helpful for institutions with limited budgets.

On the other hand, e-books can be distracting. With access to games or social media on the same device, students may lose focus during lessons.

Furthermore, extended screen use may affect students' health. Many experts warn that too much screen time can lead to eye strain, headaches, and poor sleep.

Lastly, some believe printed books offer better focus and retention. Many students report remembering more when reading from paper.

According to a 2021 study, over 30% of students admitted opening unrelated apps during e-book lessons.

In conclusion, while e-books offer flexibility, interactivity, and cost savings, they also pose distractions and health concerns. In my opinion, combining e-books with traditional books creates the best learning experience.

## **12. Impact of Technology**

"Did the technology advancement destroy our life?" Write a discursive essay in response to this topic. Include ideas: in favour and against, your opinion and support your argument with examples and facts.

### **Impact of Technology**

The advancement of technology has transformed our lives, raising debate over whether it has improved or harmed human well-being. While some highlight its many benefits, others argue it has caused serious issues. This essay will explore both sides and offer a personal opinion.

One notable advantage is progress in healthcare. Technology has enabled medical breakthroughs, such as telemedicine and advanced diagnostic tools, which make treatment more effective and accessible.

Another benefit is enhanced global communication. People can connect instantly across long distances. For example, students now collaborate with peers in different countries, enriching their education.

A further positive aspect is easier access to information. Online platforms allow users to learn new skills, research topics, or complete courses from anywhere at any time.

However, technology also brings challenges. One major concern is social isolation. Many people now rely on virtual communication, which may reduce real-life interaction and lead to loneliness.

Another drawback is the rise of a sedentary lifestyle. Excessive screen time from streaming or gaming reduces physical activity, increasing the risk of obesity and related health issues.

A third issue is mental health. Constant exposure to screens and digital content can cause stress, anxiety, and sleep problems, especially in teenagers.

According to a 2022 global survey, 68% of respondents said technology had made their lives easier overall.

In conclusion, although technology creates some difficulties, its benefits are substantial. In my opinion, when used responsibly and in balance, technology enhances our lives and should be embraced thoughtfully.

**Word Count: 249**

### **13.Relocating Abroad**

Is moving to live in another country a good idea? Highlight the advantages and disadvantages and give your opinion.

#### **Relocating Abroad**

Moving to live in another country is a major life decision that brings both benefits and challenges. While many people are drawn to new experiences and opportunities, others face serious difficulties. This essay will explore both sides and offer a personal opinion.

One major advantage is personal and professional growth. Experiencing a new culture helps individuals become more adaptable and open-minded. For example, someone who moves abroad for work may gain skills that enhance their career.

A second benefit is improved access to services. Countries with better education, healthcare, or job markets often attract those seeking a higher quality of life. For instance, a family might relocate to give their children stronger academic opportunities.

In addition, an appealing benefit is the excitement of cultural discovery. Meeting people from different backgrounds and learning new languages can be both enriching and enjoyable.

However, a key disadvantage is culture shock. Adapting to unfamiliar customs, languages, and daily routines can be stressful and confusing at first.

Another downside is homesickness. Being far from family and close friends may lead to feelings of loneliness or emotional disconnection.

A final concern is the difficulty of building a social network. Forming new friendships in a different country can be harder than expected.

According to a 2022 InterNations survey, 60% of expats said making friends was harder than expected due to language and cultural barriers.

In conclusion, although relocating abroad provides meaningful opportunities, it also involves emotional and social challenges. In my opinion, those who plan carefully and stay open-minded can benefit greatly from the experience.

**Word Count: 260**

## 14. Unpaid Student Work

Many schools today require students to work without pay for companies as part of their education. Is this more advantageous to students or companies? Discuss whether requiring students to work without pay for companies is more advantageous to students or companies.

### Unpaid Student Work

Many schools today require students to complete unpaid work placements at companies as part of their education. This raises the question: who benefits more—the students or the companies? This essay will explore both sides and present a personal view.

To begin with, students gain practical experience by working in real-world settings. This helps them apply theoretical knowledge and build professional skills. For example, a marketing student may improve their resume by managing a company's social media accounts.

Moreover, unpaid placements help students build useful networks. By engaging with professionals, they may receive references or even job offers after graduation.

In addition, students learn workplace expectations and routines. Exposure to real environments builds confidence and prepares them for future roles.

On the other hand, companies benefit by receiving extra help without salary costs. This is especially useful for small businesses with limited budgets.

They also gain fresh ideas. Young interns are often familiar with modern tools and trends, which can help improve outdated company practices.

Furthermore, unpaid work helps companies identify future employees without commitment. A strong-performing intern may later be hired full-time, reducing recruitment risk.

According to a 2022 education report, 41% of students said their unpaid placements lacked educational value and were focused on repetitive tasks.

In conclusion, while both students and companies benefit, students gain skills, connections, and confidence. In my opinion, unpaid work is useful when properly supervised. Schools should ensure placements are fair, educational, and not unfair.
