PANDA

There are many animals in danger around the world, and we can help to keep them safe.

This is the **panda**. It is a big bear with black and white fur. It has got round ears, a short tail, and dark circles around its eyes.

The panda lives in the **mountains** and **forests of China**. It eats mainly **bamboo**, but sometimes it eats fruit and small plants too.

The panda is in danger because people **cut down the bamboo forests** where it lives, and it doesn't have enough food. Also, some people **hunt pandas** for their fur.

We can protect pandas if we stop cutting trees and make safe places for them to live.

I like this animal because it looks cute, gentle, and peaceful.

DOLPHIN

There are many animals in danger around the world, and we can help to keep them safe.

The animal is the **dolphin**. It is grey with a round head, small fins, and a short nose.
It lives in **rivers and coastal waters of Asia**.
It eats fish, shrimp, and other small sea animals.
The dolphin is endangered because it can get caught in fishing nets, and pollution can make its water unsafe. We can protect these dolphins by keeping rivers clean, using safer fishing methods, and protecting the places where they live.

I like this animal because it is gentle, intelligent, and beautiful.

The Sea Turtle

There are many animals in danger around the world, and we can help to keep them safe.

The animal is the **turtle**. It is a large reptile with a hard shell, four flippers, and a small head. Sea turtles live in **warm oceans** around the world. They eat different kinds of food, such as **sea grass**, **jellyfish**, **and small sea animals**. Sea turtles are in danger because of **plastic pollution**, **fishing nets**, and people destroying their **nesting beaches**. We can protect sea turtles by keeping beaches and oceans clean, using less plastic, and protecting their nests.

I like this animal because it is beautiful, peaceful, and interesting.

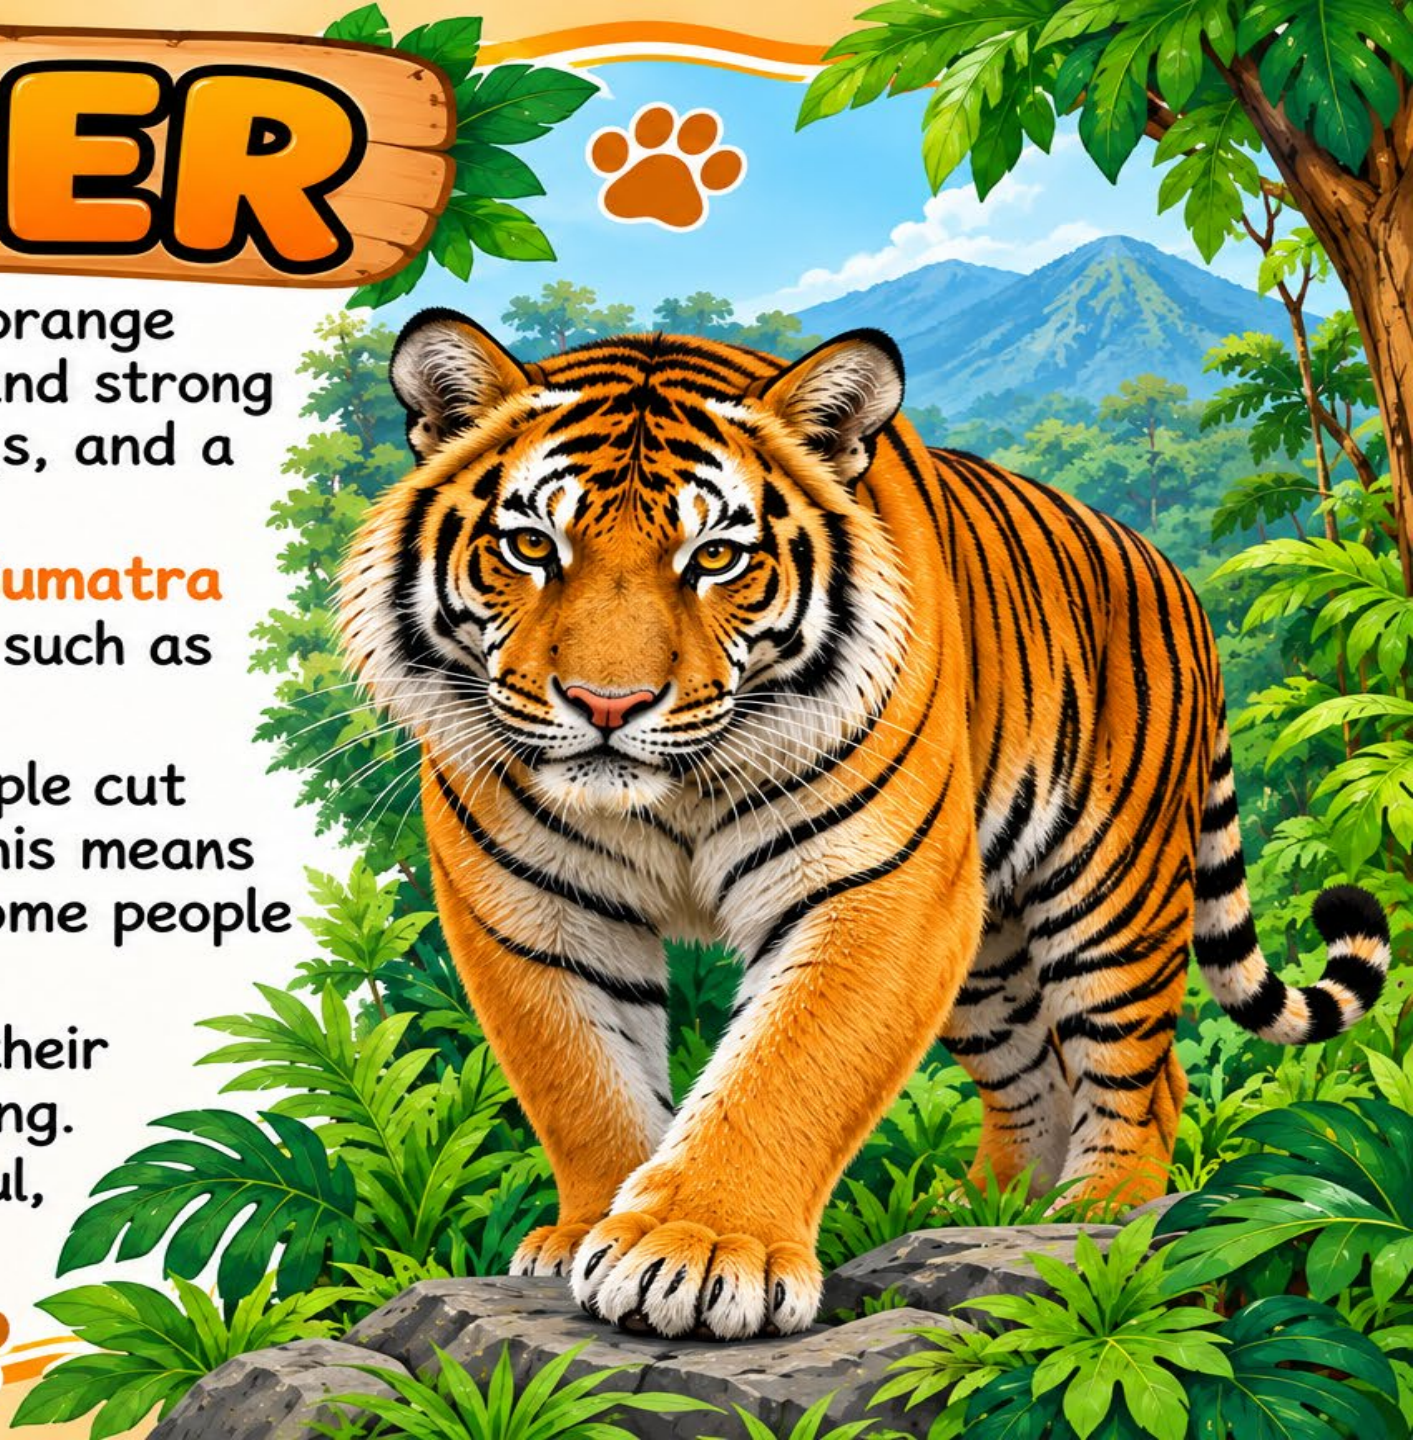

TIGER

The tiger is a wild animal. It has orange fur with black stripes. It is a big and strong cat. It has sharp teeth, strong legs, and a long tail.

The tiger lives in the forests of Sumatra in Indonesia. It eats mainly meat, such as deer and wild pigs.

The tiger is in danger because people cut down the forests where it lives. This means it loses its home and food. Also, some people hunt tigers.

We can protect tigers by keeping their forests safe and by stopping hunting.
I like the tiger because it is powerful, beautiful, and amazing.

The Blue Whale

There are many animals in danger around the world, and we can help to keep them safe.

The animal is the **blue whale**. It is the largest animal in the world. It has a long body, smooth blue-grey skin, and large flippers. It lives in **oceans** around the world. It eats tiny sea animals called **krill**.

The blue whale is endangered because of dangers such as getting caught in fishing equipment, being hit by ships, and changes in the ocean.

We can protect blue whales by keeping oceans clean and making the sea safer for them.

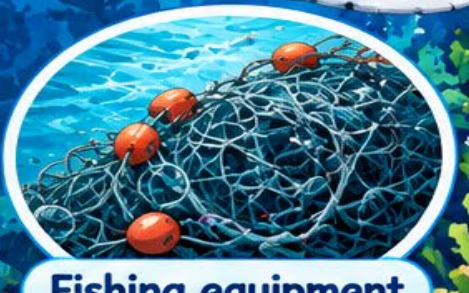

I like this animal because it is huge, peaceful, and amazing.
