“Amazing” is an international website forum where people can post their wonderful experience and share it with the readers. Four people are talking about their experiences below.

Cameron, Mexico

In our school, we did a project in groups; it was called “Reduce, Reuse, Recycle”. You can reduce energy use by turning off lights. You can save water by turning off taps. You can reuse paper and plastic bags. You can also recycle by taking your bottles and cans to a recycling centre. It was very exciting to work on this project, all students were interested in finding new ways and things to “Reduce, Reuse, Recycle”! Our school headmaster was fascinated by the result and thanked us in front of everyone.

Scott, Australia

There was a festival in our local park to raise awareness about the environment. It was amazing how many people visited the festival. There were talk shows and films about how we can prevent pollution, and there were people selling food, books and posters. It was very interesting. We had fun, and we helped the world at the same time.

Susan, USA

We grow our own fruit and vegetables – they taste great. Our little ‘natural garden’ is helping the environment too – we eat healthy vegetables, and less food that has travelled thousands of miles in aeroplanes that cause pollution. I love how our garden helps to keep the nature clean. We also recycle water by using rainwater for our plants. So our plants grow healthier and more beautiful than other vegetables.

Nick, Canada

I love animals, and my aunt and uncle have bought me a really special present. I have ‘adopted’ a rare animal! It’s an elephant called Kiruba. I can’t keep her here in Canada, she needs hot desert weather. So she lives in Africa, but I send money to people there who use it to look after her. I received a lovely poster, and I got information about her. I love helping nature directly like this.

Hunter D. Adams was born in May 28, 1945 in Washington D.C. His nickname is Patch but he does not know why he got it. He grew up in Germany, Japan, Texas and the other places where his father worked as a soldier. He was one of the best students in maths and science, who got excellent marks without studying much. When he was very young, Hunter Adams was very unhappy, and he spent many years in the 1960s and 1970s in hospitals.

When he left hospital, Adams decided to become a doctor, so he went to George Washington University for a year but then he went to another university in Virginia. When he was there, he did things in a different way. For example, he didn't like the doctors' white coats, so he wore shirts with flowers on them when he visited his patients, and he tried to make them laugh. The doctors at the university didn't like Adams very much because he was too different.

But Adams believed that people in hospital need more than medicine. He saw unhappy and lonely people, and he tried to help them not only as patients, but as people too. He spent a lot of time with children in the hospital, and often put a special red nose on his face to look like a clown and to make the children laugh.

When he finished medical school and became a doctor, Adams opened his own hospital, called 'The Gesundheit Institute', together with some other doctors. They wanted it to be a place with a different way of working with sick people.

Hunter Adams became famous during the 1980s, and in 1998, Universal Pictures made a film about his life. It was very successful. In the film (called Patch Adams), Robin Williams played Adams. I looked in every room in the house, but nothing - no cards, presents, flowers, or chocolates. I was upset but I thought, 'it doesn't matter. I can wait.'

An hour later the postman arrived and gave me lots of envelopes. 'Fantastic - my cards!' I said, and then I saw that the letters were not for me. My husband and children got up and said, 'Happy Birthday!' but didn't give me a card or present.

Then at twelve o'clock a taxi arrived at the house. I thought it was a mistake but my husband said, 'Get in the taxi. I've got your jacket and suitcase.' We went to the airport and arrived in Paris that afternoon, although I wished we travelled by train. We went shopping for my birthday present. At first, I thought of buying a watch or jewelry but all of a sudden I changed my mind and picked up a beautiful painting of the city. In the evening we had a delicious dinner - seafood, steak, and French cheese.

The next day we had breakfast in the oldest café in Paris, went on a boat on the River Seine, and walked along the famous streets. We arrived home on Sunday evening after a perfect weekend. When I left university, I wanted to travel so I went to south Africa to visit friends and family. I loved it there because the country is very interesting and the people are very friendly, but after a year I came back to England and trained to be an English teacher. My first job was in Germany in a small school where my students were adults and children (but not in the same class!). At first, it was very difficult because there were a lot of things I didn't know. My classes were usually in the morning and in the evening so I had the afternoon to think about my lessons. I loved the job because everything was new and exciting and my students were very kind to me. Sometimes we went to a restaurant or café and they practiced their English and I practiced my German.

I lived in Germany for two years and then I left because I wanted to see other countries. I was very sad to go but I knew it was time to leave. My next job was Bulgaria. It's a beautiful country next to Greece, turkey and Romania. My life there was very different because I was the only English person in the town so everybody knew me! I was a teacher at a secondary school and in my first year there I had lessons with every student in the school. It was very difficult to remember everyone's name because I had hundreds of students! My life there was very busy so I didn't really have enough time to learn the language, but I did my best and I can still remember some words today.

I'm living in England again now and I'm not teaching, but I often think about those jobs and all the great students I had.

MODEL ANSWER

Before the 1900s, there were no special basketball uniforms. Basketball players wore any type of athletic clothes which made it difficult to differentiate teams. The first basketball uniform had knee-length padded pants or shorter pants with long tights. There were two types of T-shirts, one with sleeves, while the other was sleeveless. The entire uniform was made of heavy wool. They wore special basketball shoes with suction cups.

Basketball uniforms have changed through the years. Basketball uniforms are very different. Today they wear long shorts and sleeveless t-shirts. The uniform is made of lighter polyester and nylon. They wear sneakers, this keeps basketball players cool as they run or jump. Each team has its own colours now. For example, San Antonio Spurs players wear black and white t-shirts and shorts. In future, these uniforms will change too. Players need uniforms that are practical and in fashion.

School uniform

Before the 1900s, there were no special school uniforms. Students wore any type of clothes. The first female school uniform in Bahrain was a light green colour with a long sleeved dress and a green collar.

School uniforms have changed through the years. The female school uniforms are very different now. Today, each grade has its own uniforms as each private school has a different one. For example, in public schools, primary school students wear multi coloured sleeveless dresses with a white shirt. Intermediate school students wear brown sleeveless dresses with a white shirt. As for secondary girls' uniforms, it is a navy blue sleeveless dress with a white shirt.

In future, I think these uniforms should be changed to be more comfortable and fashionable ones.

Do you like camping? Well, if you want to camp, this cool new gadget could help you. It is a smart electronic tent. You just need an app on your smartphone or tablet.

This product is amazing because it lets you camp easily without having to fix a tent yourself. It functions on solar cells. Think about it: You want to camp with your family, and you have just decided to do so. You will put this tent in your car's trunk, then you will just fix it by using an app on your smartphone. The tent will be fixed in 5 minutes. I love how the product lets you feel comfortable since it has electronic beds with relaxing pillows.

This product is incredible, but there are two things about it that I don't like. First, if it is damaged, it won't be easy to repair it. You would also have to wait for the spare parts. The company is working on this problem. They are thinking of hiring agents in many countries to deal with this problem. Second, it is very expensive and not all people can afford it. All in all, I give this product five out of ten.
