Reading (C): (14 Marks)**C: Read the following article. Then answer the questions that follow. (14/-----)****The “NO IMPACT” Family**

In the part of busy New York where Colin Beavan lives, the average family uses more than 1000 plastic containers from takeaway restaurants every year. A normal family also uses 572 plastic bags and creates 800 kilograms of rubbish every year. These are statistics which shocked Colin. He's a man who likes a challenge, so he decided to try to become a real eco-warrior and reduce his family's impact on the environment. That meant no TV, no taxis, no takeaway meals, and a lot of changes in the family's routine.

For one year in the Beavans' apartment, there wasn't a TV or a fridge, and they only used one electric light to save electricity. In the bathroom, there weren't any factory-made bottles of shampoo or bars of soap. They didn't buy those things - they used homemade alternatives. His neighbours thought that he was crazy and over reacting, but Colin explained that it is easy to make things like soap and toothpaste.

The family tried to create less rubbish and to consume less electricity and fuel. To do this, they travelled by bicycle and bought second-hand things for their apartment. Their food came from a market so they could avoid packets and boxes. They carried the food home in a basket rather than plastic bags and they didn't buy food products which came from more than 400 kilometres away.

The Beavans also avoided takeaway food so they didn't have to throw away all the containers that it comes in, and Colin always carried a glass jar with a lid. Cafés where he bought takeaway coffee put it in his jar instead of a disposable cup.

Colin admits that the experiment was tough on his family - he has a daughter who loves TV and shopping for toys! But it was an experience that they won't forget, and when it finished they were fitter, happier and a little bit wiser. They hope that people who hear about it will start thinking about their own impact, too.

C.I: Are these statements True or False? Circle (T) or (F).**(6/-----)**
