3-A story:

Yesterday I was happy when my father told me that we are going on a trip to Dubai. I like traveling very much. In the early morning, my elder brother Ali drove us to the airport. It was hot and sunny.

I was speaking with my father while the plane was taking off. Nobody was paying attention to the safety video. Shortly after the take -off, we heard an explosion (aloud noise). I looked out of the window and saw that one of the engines was on fire. We were afraid. People around me were shouting and screaming. I felt very scared. I felt that this is the end of my life. Later, we heard the voice of the pilot. He announced that he had the situation under control. He could solve the problem. Then the plane landed safely. Luckily, no one was hurt. A fire engine and an ambulance hurried to meet us.

I shall never forget that day and I think I will never fly again. It was really one of the worst experiences I have ever had. I learned that we should pay attention to safety videos on planes. Also, we shouldn't panic.

I believe that we should do everything to save it . Together, we can make a difference. Thank you for your attention.

5-Public art: كيف تنتج قطعة فنية

Murals can be drawn on different places to make them prettier. Some murals have a meaning behind them. To draw public art in your school, you need to follow a few steps to get the best results First you need to put a top layer to make the wall ready for painting. Second, draw an outline. Then, sketch and draw details and paint it with light colors Finally, add a seal coat to protect the mural. However, Some murals need different tools and special care with it.

In the end, drawing murals is easy. You just need to follow some steps. It's a nice way to present ideas and history of different countries.
