## On Top of the World!

Shaikh Mohammed Bin Hamad Al Khalifa and his team climbed Mount Everest in May 2021. They are the first Bahrainis and the first international team to reach the top of the world's tallest mountain.

Climbing Everest is hard because of the cold weather. The mountain is very dangerous for climbers. The team trained in the Himalayas for two months and climbed smaller mountains to get ready.

When they reached the top of Everest, they raised the Bahraini flag to celebrate their success.

### Fishing With My Grandfather

This photo always reminds me of fishing with my grandfather. He loves fishing and used to try to get my brother and me to like it it, but we never went until one day when I changed my mind.

After waiting for three hours, I asked him why he enjoys fishing so much. He told me that when he was young, fishing was all he had because there was no TV or phones.

After taking this picture, we caught the biggest fish I had ever seen. I started fishing with him more often after that.

### Ocean Exploration vs. Space Exploration

Exploring the ocean and space are both important, but which is better? Space exploration is exciting, but it costs a lot of money. The ocean, however, gives us important things like medicine, oxygen, and food. We can also find jobs and fuel from the ocean. Exploring the ocean helps us learn more about our planet.

In the end, it's better to spend time, money, and effort exploring the ocean. It is cheaper and helps us in more ways than space exploration.
