It's normal to have a big family and share some personality traits with others. Many people say I look like my cousin **اي اسم تبونه**, but we are different in some ways.

اسم and I both like outdoor activities. We enjoy spending time outside, cooking, shopping , and swimming. We also love nature.

However, I love being outside in winter because I love the cold weather. **اسم** prefers staying inside and reading books. I'm very active, but **اسم** isn't. When we play video games, I enjoy competing, but **اسم** doesn't like competition.

Even though we are different, I love spending time with my cousin. We always have fun together!

فقرة الوحدة الأولى مقارنة شخصيتك
وشخصية فرد من عائلتك أو صديقك

When you are scared of an animal or insect, it can be hard. When I was young, I got stung by bees, so I became very scared of them. But as I grew up, I wanted to stop being scared. I followed a few easy steps.

First, I read about bees. Then, I watched videos and looked online to learn more. After that, I went to see bees outside. Slowly, I stopped feeling afraid.

I found out that bees are helpful. They make honey and help flowers and plants grow. Bees work hard and live together nicely.

In the end, I stopped being scared. You can do it too if you try!

فقرة الوحدة الثانية كيف تدير خوفك أو تتخلص من مخاوفك

Many people are afraid of parrots, and this makes me surprised. I got a parrot, and I wanted people to like it. So, I decided to teach it to be a nice pet.

First, I taught my parrot to stand on my finger. Then, I gave it a treat every time it did something good. Slowly, the parrot learned that it would get a treat for listening.

One day, I took my parrot to a family meeting. After we ate, I showed everyone what my parrot could do. They were very happy.

By the end of the day, my cousins were not afraid of the parrot anymore. They even asked to feed it.

As you can see, it's easy to help people like your pet. You just need time!

الوحدة الثانية: كيف تدرب حيوانك الليف

Subject: Camping in Sakhair (Group Behaviour)

Hi اسم,

Thanks for your email. It's been a while ! Your project about group behaviour sounds nice. I think we all act differently with our families.

In winter, we go camping in Sakhair. We spend the day doing fun things.

I love riding buggies with my sister. Barbeque time is fun too, even when dad burns the food!

At night, we sit by the fire, tell scary stories, or play games . It's always fun with my cousins.

What about you? What do you enjoy doing with your family? Do you act differently with them?

Write soon!

فقرة الوحدة الثالثة عن سلوك جماعي

**Animals have been flying for millions of years.
There are four types of animals that can fly:
insects, birds, bats, and pterosaurs.**

**Bats are made for flying. Their bodies are light,
and their bones are hollow. Their muscles help
them move their wings and stay in the air.**

**Pterosaurs were flying reptiles . They had strong
wings covered with skin and hollow bones. They
could glide and flap their wings, and the wind
helped them stay up.**

**In short, many animals and insects can fly. But
bats and pterosaurs are not the only ones—there
are many kinds of birds and insects that can fly
too.**

فقرة الوحدة الخامسة عن طيران الحيوانات

Before planes, people used other flying machines. Today, we still use some of them. Some use air to fly, while others use engines.

Hot-air balloons move with air. Hot-air balloon pilots go up or down to find the right air to move the balloon.

Gliders also use air to fly. Small planes help gliders take off, but after that, they move only with the air.

A helicopter doesn't have wings, but it has an engine that makes it spin fast. This helps it go up into the sky. Helicopters are now used by doctors and the army.

So next time you fly, remember that planes aren't the only way to travel. Which flying machine would you like to try?

فقرة الوحدة الخامسة عن الآلات للطائرة
