موضوعات الكتابة - الفصل الدراسي الأول

Unit 1 Compare and contrast essay

Write an essay of 110 – 130 words to compare and contrast your personality with that of a family member or friend.

I come from a large family with many aunts and uncles, but not as similar as each other.

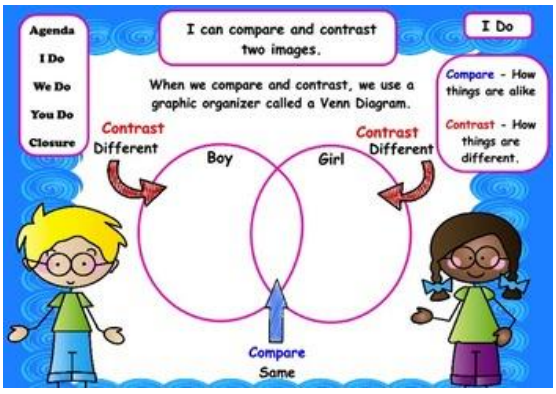

My sister and I are very similar, we like outdoor activities. We usually go fishing and camping together. We are also alike in our free-time activities like going for walks.

On the other hand, we don't have the same taste in food.

I like to have my dinner at home, while my sister loves to eat out.

Although we are close in age, but we think in a different way.

No matter how different or similar we are, as long as we do things together, we feel very happy.

Unit 2 Process Description essay

Many people are scared of birds. Imagine you are always around birds. You don't want to fear them. How could you help people understand birds? Write an essay of 110–130 words to your English friend describing the process.

Like many people, I used to be scared of birds because I was attacked by a bird when I was young. So, I decided to face my fear directly.

To do this, first, I started reading about different birds and learned about their importance in for the environment. Then, I began watching birds in their natural homes. Later, I became more comfortable around them.

Finally, I visited a bird zoo, where I had a parrot stand on my hand; it was a strange but amazing experience at the same time!

Managing your fears can be difficult, but it's important to try. You can start by reading and learning more about what you're afraid of. Take your time and try to feel more comfortable step by step. The end result is worth it!

Unit 3 Personal email

Every winter, tens of thousands of Bahrainis go camping in Sakhair. Write an email of 100–120 words describing this group's behaviour in Bahrain. Make sure you include several examples.

To: Ahmed **From:** Mohammed

Subject: Camping in Sakhair (Group Behaviour)

Hi Ahmed,

Thank you for your email. It's been a while since we last met. I find your project on group behavior quite interesting!

Winter has come, usually we go camping with our family, in Sakhair, and we spend the whole day together, doing fun activities.

There are a lot of activities to do there such as buggy riding, which I love doing with my older brother. Also, barbeque time is always fun. At night, we love gathering around the fire and telling scary stories.

For example, if one of us starts telling a scary story another one tells a scarier one, and the rest of us will join in, we can't help it!

What about you? What do you enjoy doing with your family? I'd love to know if your behaviour changes when you're with them.

Write soon!

Mohammed

Unit 5 Classification essay

Write a classification essay of 110–130 words to describe two types of animal flight.

You may use this plan:

Paragraph 1: Introduction, state which two animals you are going to describe

Paragraph 2: describing the flight of one animal (Support **with fact**)

Paragraph 3: describing the flight of the second animal (Support **with fact**)

Paragraph 4: conclusion, a statement about the two animals

Flight can be seen in three types of animals: birds, insects, and bats.

However, there are other animals that can glide or appear to fly, such as the Colugo. Bats are the only mammals that can fly and they do so using their webbed wings made of thin skin that stretches out from their fingers. They use an advanced navigation system while flying.

On the other hand, the Colugo is not a lemur and does not have wings, but it has flaps of skin between its legs, tail, and neck which help it glide through the forest. Even though wings are important for flying, not having them doesn't necessarily mean an animal can't fly.

Can you think of any other animals that can fly without wings?
