## **Unit 4 Lesson 7 writing A cover letter**

Write a cover letter of 100-120 words applying for a part time position in an H&M clothes shop in Seef mall. Explain why you want this job and why you are suitable for the position.

The manager

Hassan Ali

H&M Fashion

PO BOX 123

Seef Mall

Bahrain

Kingdom of Bahrain

**( shop assistant)**

Dear Sir/Madam

I am writing to apply for this position which I saw advertised on your website. I am a secondary school student and I am looking for part time work. I am interested in this job and fashion. I am always a fan of your shop

I am an organised, self-confident and responsible person. I enjoy meeting people and I follow modern fashion designers and styles. I speak many languages like Arabic, English and French. I have many computer skills Also, I have an experience of this field ;working in a clothes shop. My manager was very satisfied with my performance.

As noted in my attached C.V, I think that my skills and personality are very good fit for this position. I look forward to hearing from you.

Yours faithfully

Ali Hassan

## **Unit 6- Writing (persuasive essay) Model : Exploring ocean VS outer space**

Exploration is very important. Scientists have two opinions. some support exploring oceans but others support exploring space.

Scientists think exploring space is important as it gives us chance to live there. Also, if we discover creatures there. we will benefit from them. But exploring space is costly. Also, astronauts need long time and skills to be prepared. Besides it puts their lives in danger.

On the other hand, Scientists think that oceans are important. They provide us with air, healthy sea food which we eat and the weather we live in. Oceans are full of treasures, minerals, and mysteries.

To sum up, I think we have only explored 5% of oceans. we didn't discover many things. Besides exploring oceans is cheaper. and less dangerous than exploring space. Scientists should focus on what people need.

---

## **Model 2 Developing Spacecraft vs. Developing Robots**

It's very important to develop technology to benefit from it. Some people think technology should focus on building spacecraft. Others think building robots is more important .

Developing spacecraft is important for space explorers. But this costs billions of dollars more than building the smartest robot. People who support space exploration think it is the origin of life in the universe. Though this knowledge is amazing, there are no practical uses of it for people now

Modern robots can be built much more cheaper than spaceships, and they can be used for practical purposes on Earth. People can benefit from robots They can work in extreme dangerous conditions. They can take apart bombs, do hard surgery and do housework too.

To sum up, it's better to give due care, time and money to develop robots as they are cheaper to develop and more useful than spacecrafts.

## **Unit 7 writing a story: Model 1 :-Fishing With My Grandfather**

Whenever I look at this photo, I think of an afternoon fishing with my grandfather. My grandfather loves fishing. When we were younger, he tried to get my brother and me excited about it. Every Saturday he asked us to go with him. At first, we would, but fishing seemed so boring to us. After that, he would go alone.

One Saturday afternoon, I changed my mind and decided to go with him. So, we got in the water, threw the line and waited. After three hours all we had was a single tiny fish. 'Grandpa, why do you like standing out here for hours like this?' I asked.

'Well,' he said. 'When I was a boy, fishing was everything because I didn't have TV, or video games or smartphones. So, I fished.'

This photo really changed how I see my grandfather. I see a quiet older man who has seen many changes and experiences.

Looking at the photo also reminds me that my opinion of fishing changed. that afternoon. After taking the picture, we could bring in the biggest fish I had ever seen! It was really exciting. From then on, I went fishing with him whenever I could.

## **Unit 7 :-Model 2**

### **Horse Riding**

Whenever I look at this photo I remember my uncle. His favorite hobby is horse riding. 'Horse riding is a calm and exciting hobby' he says.

One time I decided to go horse riding with him. It was in the afternoon. We prepared the horse. Next, my uncle got on the horse and started riding it. He kept doing the course over and over again. Then, I took this picture of him. 'Why do you like riding horses this much?' I asked.

My uncle said, 'When I was little I lived in a farm. There were a lot of animals that I liked but my favourites were the horses. I used to feed them, bath them, and ride them. I like horse riding because it reminds me of those days.'

This photo made me appreciate horses and brought me closer to my uncle. It also made me know how simple things can bring happiness.

### Unit 7:- Model 3

### Playing golf with my uncle

Whenever I look at this photo, I think of an early morning day playing golf with my uncle. My uncle loves playing golf so much. When we were younger, he tried to get my cousin and me feel excited and happy about it. "It's a wonderful way to spend morning playing golf together" he told us. Every Friday he asked us to go with him. At first we would, but playing golf seemed so boring to us. Finally, we told him that golf isn't our thing. After that, he would go play golf alone.

One Friday morning, I changed my mind and decided to go with him to the golf course. At first, I thought I would enjoy golf but after 2 hours of playing I still feel bored.

"Uncle, Why do you like this game so much?" I asked. 'Well,' he said. "When I was a little boy, golf was everything to me. I didn't have TV, or video games or smartphone. So I played golf. Now, when I play golf, I go back to being that happy boy. It was a happy time".

This photo really changed how I see my uncle. I don't just see a quiet old man, but rather somebody who has seen many changes and had many experiences. From then on, I go with my uncle to the golf course whenever I could.

### Unit 7:-Model 4

### Farming with my father

I took a picture of me with my father growing vegetables on my grandfather's farm, who passed away a long time ago. Whenever I look at this picture, I remember the beautiful memories and the lofty meanings it expresses.

When I was 9 years old, I used to see my father bring home from time to time a group of vegetables such as (tomatoes, cucumbers, carrots, lettuce, onions, potatoes, lemons, eggplant and cabbage) so my mother did not need to buy vegetables From the market, where she used vegetables in many of the delicious dishes she used to make.

One day I said to my father: Why, father, do you tire yourself in agriculture? Why not save yourself time and effort and buy vegetables from the market? He said to me: What do you think, my son, to come with me to the farm, and there I will answer your question. I said to my father: I agree.

The next day I went to the farm, and I saw my father how he grows vegetables, and I saw how he gets tired, but he is very happy, and at that time my father answered my previous question, and said to me: Life needs struggle until we get what we want, and we must rely on ourselves in order to feel the value of the thing.

So I asked my father to go with him to the farm every Friday after finishing the prayer and try to plant what I could. So I used to go to the farm every Friday with my father and took this beautiful souvenir photo with him

## **G9 - Unit 8 Why We explore    Lesson 7 – Writing a news report**

**Write a news report of 110-130 words about Use a topic from this unit or another an exploration or adventure. Exploration that interests you.**

Shaikh Mohammed Bin Hamad Al Khalifa climbed Mount Everest in May 2021. His team members are the first Bahraini nationals to climb Mount Everest. They were also the first international team to conquer Mount Everest

Climbing Everest is an ambition for many climbers, but it requires experience and skill to climb it safely. The climate of Mount Everest is one of the most difficult things for climbers managed to face . The warmest daytime temperature is -19 °C on the summit and it can reach -33 during the coldest month. So, the weather on Mount Everest is changeable.

The Bahraini team trained in the Himalayas in Nepal for two months before starting expedition to conquer Everest. They climbed several smaller mountains as part of their preparation. On the day they reached the summit of Everest, the team held the Bahraini flag at the top to mark their achievement.
