Nowadays, people move from villages to the cities trying to find better jobs and work. This is called rural depopulation. They leave the country moving to the city leaving the country empty to some extent and causing major problems in the city.

There are some advantages of this phenomenon such as; finding better paid jobs and enjoying good services. Also, they contribute in constructing the nation and their country.

On the other hand, there are some disadvantages of this phenomenon; such as leaving the country deserted and empty. Moreover, it will lead to some more problems in the city such as pollution or even crimes. This leads also to the collapse of farming in the village as it becomes deserted and neglected because the farmers move to live in the city.

Nowadays, some businessmen move to live in the country escaping from the problems of pollution and traffic, and enjoying the fresh air, virgin nature, leafy streets and calm in the country that thing they miss in the town or the city.

To sum up, I prefer village life because it is healthy and calm, and I think we can make city life less stressful. I also prefer village life because it is healthier, active and simpler in habits than people living in towns. People who live in villages breathe pure air.

A large number of people move from their homes in country areas to live in cities. Plan and write a report of (14 sentences 160 words) discussing the causes of rural depopulation and its negative effects.

Nowadays, more and more people are moving from the country into the city. This is called Rural Depopulation. In this essay, I am going to discuss the causes of Rural Depopulation and its negative effects.

Many people prefer the city to rural areas. There are many reasons for them to move to the city. One of the biggest reasons is that they seek better public services and education for their children. They even believe to have better paying jobs there. The multiple and vast types of entertainment there such as cinemas, malls, theatres and restaurants play a big factor in people moving to the city.

People do not realise that their move to the city can have a negative effect on the areas they leave. As people leave from rural areas to cities, the amount of people living there decreases. This is called rural depopulation. It can result in people going out of business and even in farms being deserted. Moreover, as more and more people move into the city, they risk the chance of causing overcrowding.

Living in a city can offer you many things but at the same time you have to be willing to cope with the overcrowding. You need to understand that your choice will not affect you but others as well. For even though you may find great opportunities, you may be robbing your old area from some!

Our past, present and future are very important as well so we should have a good use to our time. It is not a surprise when we discover that we have less free time than we had in the past because life became very busy and stressful or tiring. But of course, they had leisure time in the past and they were enjoying it for sure.

The question is; How were they spending their free time? They were spending their free time in telling stories, visiting relatives, playing their simple games such as; Dama, Ambar and Al Khabsah...etc. and they were playing chess as well. They made their games from simple items from their daily life because they had a lot of time to utilize them. They used stones, rocks, shells, sand and almost any other everyday item you can think of. They enjoyed their time very well during their play.

Nowadays, we spend our time in a very different way. We can play computer games, play online, go shopping, chat on the internet or even communicate via the social media using Facebook, WhatsApp, Instagram, Twitter ...etc.

People have always enjoyed pastime activities both in past and present time. In this essay, I will compare how people spent their pastime activities in the past and present time.

One would think that people did not have many resources to create multiple activities in the past, however, they are mistaken. In the past, people had to rely on their creativity to create pastime activities. They had many activities that involved great skills such as weaving carpets, embroidery and even carving things out of wood. These were fun activities that had a useful outcome. They also enjoyed playing fun games such as Khabsa, Amber and Dawama. These activities were simple yet entertaining.

Nowadays, people still enjoy leisure activities. Some activities are very similar to those in the past, yet some are quite different. With the development of technology, people spend much of their leisure time on the internet as well as social media and watching TV. Nevertheless, people still enjoy some skillful activities such as painting and even arts and crafts. Moreover, people also enjoy playing games, however, these games have developed into computer games.

To sum up, people have always found ways to enjoy themselves whether in the past or now. However, as times change so do the types of activities. Games in the past were simple and group socialising, whereas nowadays they are more visual.

They may face bad weather conditions, like strong winds or freezing temperature. They may also face dizzying heights, lack of oxygen, shortage of food or water, or sometimes getting lost.

They usually overcome these problems by hard training and getting ready before any adventure. Many people like to push themselves to extreme limits. Some people argue that it has a lot of benefits, whereas others disagree. In my opinion, pushing yourself to the limits is the only option as it results in great accomplishments and even wealth.

Pushing yourself to the limits has many benefits. In fact, there are many examples of people pushing themselves and making amazing accomplishments as well as fame and wealth. Zaid Al-Refaie is a great example. Ever since he has got a lot of attention and has become an example of people pushing their limits. That is why people are encouraged to push themselves out of the comfort zone.

On the other hand, some people are against pushing themselves to activities like these. Doing extreme sports can result in many difficulties such as exhaustion and can even be dangerous. Moreover, they may have potential problems like injury, frost-bite and even getting lost. However, this is not an enough excuse for not pushing yourself as fear will leave you with nothing.

In conclusion, it is true that beating the record is exciting. However, it is not easy. In fact, if you are willing to push yourself to the limits, then you need to know how to deal with the results.
