VI- Reading Comprehension (110 Marks)

110

Read the following passage carefully, then answer the questions below:

Doctors say that there are several kinds of headaches. Each kind begins in a different place and needs different treatment. Some of these headaches start with a change in vision or sight. The person sees wavy lines, black dot, or white spots in front of the eyes. This is a warning that a headache is coming. The headache occurs on only one side of the head. The vision is blurred and the person may vomit from the pain. These headaches are called the migraine headaches. They are more frequent in women than men. Sleep is the best cure for **them**.

Cluster headaches, which also start in the arteries, are called cluster headaches because they come in clusters or groups. A cluster headache lasts only for two hours and then goes away. At the beginning of the cluster headache, the eyes become red and watery. There is a steady pain in the head. Men have more cluster headaches than women do.

The muscle headache, which starts in the muscles in the neck or forehead, is caused by tension. When the person becomes nervous about something, or has problems at work, or at school, or at home, the neck and head muscles become **tense** and the headache starts. A muscle headache usually starts in the morning and gets worse as the hours pass. There is a steady pain, pressure and a bursting feeling. Usually, aspirin doesn't help a muscle very much.

How do doctors treat headaches? If a person has frequent headaches, the doctor first has to decide what kind they are. Medicine can help, but there are other ways to treat them. The doctor asks the patient to analyze his or her daily living patterns. A change in diet, or an increase in exercise might stop the headaches. If the patient realizes that difficulties at home, or at work, or at school are causing the tension, it might be possible to make changes and decrease these problems. Psychological problems and even medicine for another physical problem can cause headache. The doctor has to discuss and analyze all these patterns of the patient's life. A headache can be also a signal of a more serious problem. So, patient should realize that there is no magic cure for headaches, but doctors can control most of them.

From a, b, c and d, choose the correct answer: (5x10 = 50 Marks)

VII- Summary Making (60 Marks)

60

Read the following passage, then do as required:

Illegal immigration is a big problem for some countries. To prevent it, certain measurements can be applied. Creating more job opportunities in the immigrants' home countries is a good way. If migrants can find jobs at home they will have no reason to immigrate. Also people need to be warned against illegal immigration before they leave their home countries. If more people are aware about the risks, maybe fewer will break the law. Setting penalties to illegal immigration is also important. The immigrants, though, are not the only ones who need to be punished. Smugglers, who transport immigrants into a country illegally need to be punished too. Finally, provide a way for immigrants to return to their home countries. To apply this solution, governments could establish phone numbers where immigrants can call for help in returning to their countries.
