Grammar Reading Comprehension**Read the following passage then answer the questions below:**

Louis Braille was born in 1809 in a village in France. When he was only three years old, he had an accident while he was playing in his father's shop and became blind. His father tried to teach poor Louis how to read but he couldn't. Young Louis was very clever. He was also very good at music. At that time the blind were trying to read and write in different ways, but it was very difficult for them. Something should happen to enable the blind to read.

When Louis was sixteen years old, he had the idea of using dots, so **he** invented this kind of reading and writing by touching dots with the fingers. This is really the same way the blind use today. In 1828 Louis worked as a teacher for the blind. He died in January 1852 at the age of forty-three. Nowadays millions of blind people can read Braille in many languages. The blind can read in Arabic too.

We shouldn't forget to respect and encourage people who serve the humanity. In the Arab world, there isn't enough encouragement to the disabled or talented people. Sometimes, our societies ignore them.

Reading Comprehension**Read the following passage then answer the questions below:**

People grow two sets of teeth during their lifetimes – the primary or baby teeth, and the second, permanent teeth. The first primary teeth appear when a child is about six months old. The rest of them grow between the sixth and the thirtieth month, and there are only twenty teeth in this set.

The permanent teeth in humans **appear** between the sixth and the fourteenth years of a child's life. In many cases, children still have their baby teeth as well as the permanent set, or some of **them**, until they are about ten or twelve. This can look very odd, because the permanent teeth are often bigger than the baby teeth, and because the first of the second set to appear are usually the two front teeth, making the child look very funny. There are thirty-two teeth in the second set, although the four wisdom teeth don't usually appear until the person is in his or her late teens or early twenties. It is as well to remember that this set is the one you will have for the rest of your life, so great care must be taken to make sure that they won't go bad or have to be pulled out!

Reading Comprehension**Read the following passage then answer the questions below:**

The dictionary is the most important tool for all language learners. It gives them the different meanings and spellings of words. Most dictionaries help to pronounce words correctly by providing pronunciation and phonetic symbols. Moreover, they show the learners how to use the words correctly by giving them examples in meaningful sentences.

When you find a new word in a comprehension passage, it is not a good way to think directly of using the dictionary all the time to know its meaning. It is better for you to try first to understand the main idea of the passage and guess its meaning. Second, don't forget to look at the opposite of the word and try to **remember** it. If these two ways are not helpful, get the dictionary then and look it up. You will find different meaning for one word. You infer the suitable meaning through the text.

Some books have a mini dictionary at **their** backs. The electronic dictionaries are the **latest**. They have more advantages than the printed ones because they are easy to download and carry, you can take them with you everywhere and listen clearly to the correct way of pronouncing words. Fortunately, smart phones can be supplied with different dictionary applications.
