Reading Comprehension (16 Marks)

Read the following passage, then answer the questions below :

In England, many parents think that it is important to teach their children how to swim. They think swimming makes them more respected and stronger among their friends. They usually take them to public swimming pools or sports clubs on holidays.

One often sees that parents are always anxious about this issue. They are trying to force their **frightened** children to swim. I believe that pushing the little child to water can be a big mistake. As I see, parents commit another mistake which is to give children a rubber ring or wings to help them. When a child uses these things, he / she has a feeling that swimming is a hard task to do. This makes the child think it is dangerous to get his/her head under water.

When my children were young, we usually spent the weekends in mountains where there was a circular water tank. It was about two metres deep. I let **them** swim there. I never gave them rubber rings or water wings while they were in water. My eldest son began to jump into the tank. Soon, his brother and sister got used to water.

A-Choose the correct answer from a, b, c and d:

1-What is the best title for this passage?

- | | |
|----------------|---------------------------|
| a-London pools | b-Swimming in England |

- | | | | |
|-----------|----------|-----------|----------|
| a- strong | b- angry | c- afraid | d- upset |
|-----------|----------|-----------|----------|

4- What is the purpose of the writer in this passage?

- a-Children can swim in England.
- b-Children should learn at their own speed.
- c-Children must learn swimming quick
- d- Swimming is dangerous.

5- When do parents usually take their children to public swimming pools?

- a- on holidays.
- B-at the weekends

READING COMPREHENSION

Read the following passage carefully then answer the questions below:

What do the astronauts on the Space Shuttle do with their free time? Sure, technically they're on the job 24/7 a week, but when they have free time, they like to do the same things they do on earth. For example, astronauts spend about two hours every day exercising. This is really important to make sure that their body keeps working. Remember, on earth, when we are awake, we move against the force of gravity, and our muscles and bones have to support our bodies. In space, there is no gravity, so the body doesn't do any of this supporting work. This means that the body can become **weak**.

Astronauts use treadmills to exercise. A treadmill is a machine for running in one place. A wide belt moves under the astronaut's feet, so it feels like he is moving forward while running, though he is actually staying in place. The only real difference between this treadmill in space and treadmills you may have seen on earth is that the astronaut has to be strapped onto the treadmill in space so that he doesn't float away.

As far as the rest of their free time, the astronauts bring some of their personal belongings into space. They can read books or listen to music. At the International Space Station, they can also watch movies on DVD, and once a week **they** can talk to their families. Many of the astronauts enjoy taking photographs from the Space Shuttle's windows.

a. Choose the correct answer from a, b, c and d: (6 x 2= 12 Ms)

1. The best title for this passage could be:

- a. The Force of Gravity
- b. International Space Station
- c. Space Shuttle
- d. Free Time in Space

2. The underlined word **weak** in the 1st paragraph is the opposite of :

- a. real
- b. awake
- c. free
- d. strong

3. The underlined pronoun **they** in the 3rd paragraph refers to:

- a. movies
- b. books
- c. the astronauts
- d. personal belongings

4. The main difference between treadmill in space and on earth is :

- a. treadmill in space is faster.
- b. treadmill on earth has a belt.
- c. treadmill in space has straps.
- d. treadmill on earth moves forward.

5. The astronauts are at their workplace 24/7 a week because:

- a. they cannot go home.
- b. they have to work day and night.
- c. they like to stay with their friends.
- d. they don't have enough time for exercising.

6. The purpose of the writer in writing the passage is to:

- a. explain how to use treadmills.
- b. compare between different space stations.
- c. inform us about how free time in space is spent.
- d. persuade people to travel to space.

b. Answer the following questions: (2 x 2= 4 Ms)

7. How do astronauts keep their bodies working?

.....

8. Why can't astronauts practise outdoor games?

.....

Read the following passage and answer the following questions:-

Food is very important for living beings because it gives them the energy they need for work and to live. We get food from different sources like plants, fish and animals. The population is increasing quickly, so food will not be enough for them in the future. Some scientists do their best to find food for everyone. We must reclaim the desert land to enrich and cultivate it.

We must make more fish farms to get the fish needed for people. We can also grow more crops to face the increasing demand for food. A lot of governments are interested in making more animal farms to get enough food for all people. If we do so, everyone will find more food for all his family. If a country has food for all people, they will be free and strong, then **they** can decide what they want. Read the following passage and answer the following questions:-

From far out in space, Earth looks like a blue ball. Since water covers three-fourths of the Earth's surface, blue is the colour we see most. The continents look brown, like small islands floating in the huge, blue sea. White clouds **wrap** around the Earth like a light blanket. The Earth is shaped like a sphere, or a ball. **It** would take years to walk around the whole planet.

A spaceship can fly around the widest part of the sphere in only 90 minutes. Even though spaceships have travelled to the Moon, people cannot visit the Moon without special suits. The Moon has no air or water. Plants and animals can't live there either. Astronauts first landed on the Moon in 1969. After that, there were six more trips to the Moon. They brought back Moon rocks, which scientists are still studying.

The Sun is the closest star to Earth. A star is a hot ball of burning gas. The Sun looks very big. But the Sun is just a medium-sized star. The burning gases from the Sun are so hot that they warm the Earth. Even though the Sun is always glowing, the night here on Earth is dark. That's because the Earth turns around, every 24 hours. During the day, the Earth faces the Sun. Then we see light. During the night, the Earth turns away from the Sun. Then it faces the darkness of space. Each day we learn more about the Earth, the Moon, and the Sun.
