Read the following passage and answer the questions:

Artificial intelligence (AI) is when computers can think and learn like humans. AI is used in many things we use every day, like search engines, recommendation systems, and even talking to us like a friend. It can also help cars drive by themselves and create art. AI is really smart and can do things that humans can do.

AI is a type of technology that helps computers think and solve problems. It can do things that only humans used to be able to do. AI can learn from data and make decisions based on what it learns. It can also understand and talk to us like a real person. AI is getting better and better at understanding and doing things that humans do.

.....

.....

.....

Answer:

Happiness

No doubt, all of us want to be happy. There are many sources of happiness. Family, friends, faith, work and enough money are some sources. To be happy, you need some elements. The first element of happiness is having spiritual life. The second element is using your strength in a positive way. The third element is experiencing pleasures of life.
