Most people like watching TV, especially during their free time. They enjoy eating snacks while watching TV. There are many different programmes and hundreds of channels to watch. In general, parents like watching comedy and talk shows, but children love watching cartoons a lot. However, watching TV has both advantages and disadvantages.

On the one hand, we learn a lot of information about places and people. Also, watching TV is a great way to get family and friends together on weekends. Moreover, children can learn a lot from educational channels or programmes.

On the other hand, watching TV can cause health problems such as obesity. I think that people get overweight because of eating junk food while watching TV. Also, watching TV wastes a lot of time as pupils may forget to do their homework. In addition, there are many programmes that don't teach good values to children.

To sum up, parents should choose the TV programmes and channels that their children should watch. They should also limit the time their children spend in watching TV.
