Optical Tricks

xllwx5

::🎓⬇️المقدمه

Hello ... My name is

**Today I will give you
apresentation on optical
illusions, and in the end I
will give you some
questions and I hope you
like them.**

xllwx5

::🎓⬇️النهايه

**In the end, I hope you
like it , and thank you for
listening 🎧💕💕.**

What is visual deception

Visual deception is to see the image in front of you on a fact that is not its real fact, because of deceit or mislead vision.

Where visual deception occurs because the information collected by the eye is processed in the brain in a way that produces false results that are not identical to reality and truth.

xllwx5

And hence the trick is based on many possibilities, the most important are delusions that occur naturally and cognitively in addition to the special delusions.

What is important is that most of the visual tricks that take place are the installation of images next to each other in a deliberate manner to produce the desired results.

Types of visual tricks

xllwx5

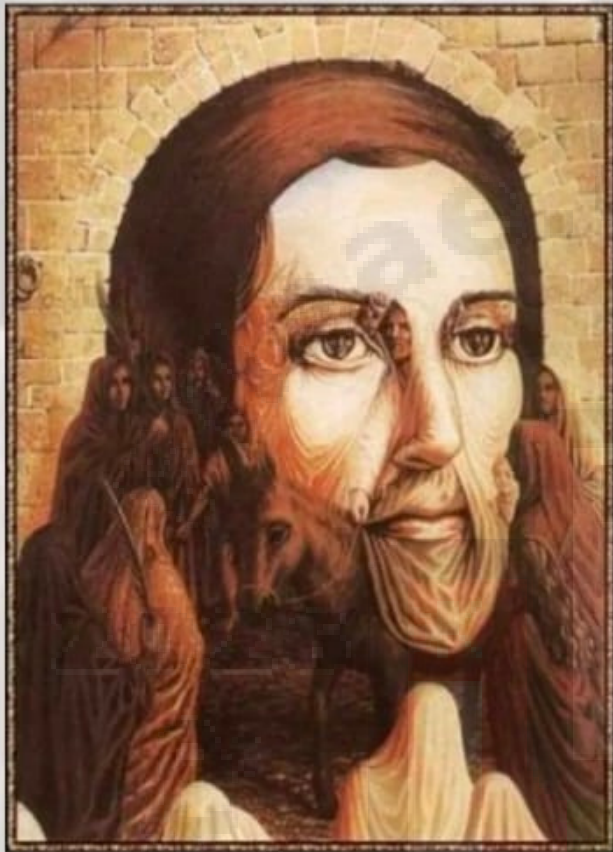

Types of visual tricks Tricks of color, and tricks related to geometric shapes. This type of trick depends on the geometric shapes and this type of trick is called "Roger Panrose".

And there are tricks that involve the process of moving images as a trick of three-dimensional image of the animation.

xllwx5

Finally, there are deceptions related to sizes and measurements. These tricks are called "Milar Lie".

OPTICAL TRICKS

xllwx5

Computer Crimes

There are many crimes in our society like theft, murder, and fraud. New crimes, like online identity-theft, are also growing. Techno criminals use computers to commit their crimes.

They find personal information and credit card numbers to steal money. It's hard to catch these criminals because they are invisible. Their crimes are not easily proved by anyone.

We should keep ourselves safe from techno criminals by using a good antivirus program, and using strong passwords. We shouldn't deal with strange adverts or emails.

Finally, the government should impose strict laws to protect citizens in society.

Computer Crimes

The Importance of Law

Law is very important in society. Man invented law many years ago to ensure justice. Nowadays, it is a must to live in peace. Law can protect our rights and lives. Also, it keeps our properties safe.

xllwx5

A society without law is not a society to live in. Crimes will be everywhere and there will be many victims. Law is the only way to punish criminals. Therefore, it can stop crimes.

Kuwait has a well-structured system of laws. The laws, in Kuwait, are taken from the Holy Qur'an and Haddith. In Kuwait we have many types of law. For example, we have family law, civil law and criminal law.

Finally, I think we should respect law. It ensures that safety of our future generations.

Voluntary Work

Humans around the world are struck with many disasters. Natural disasters, wars, famine, and disease. These disasters destroy the lives of many people every day. Voluntary work is a powerful way to help.

you can help

Volunteers give their time, effort and health for saving people that lived through such disasters.

Voluntary work means helping anyone in need without getting any money. It aims at helping people who are suffering. It is a sign of compassion and empathy. KRCS is a Kuwaiti organization that provides charity projects for money support. Their voluntary work is done inside and outside of Kuwait. It helps the needy families and raises awareness inside the country.

The volunteers are motivated. Their goal is to ease people's suffering and bring happiness. They don't wait for rewards or benefits.

Voluntary Work

Xllwx5

VOLUNTEER

Donations

We thank God that we live in welfare. Technology gave us many inventions that made our life easier, safer and more comfortable.

Nowadays, many countries suffer from poverty, lack of medical care and illiteracy. Their needs differ from a country to another.

Xllwx5

Some need fresh water supplies. Others are in need for medical care like medicine. That is why we should help in any way we can. Donating money is a way of showing empathy. As small amounts of money will not affect our life, but it will give others a better standard of life. You can also do voluntary work.

Some people don't know about the problems in other countries, so campaigns and adverts are a way of raising awareness and money. Compassion, empathy and support are basic in Islam. We should help any human in need, Muslim or not.

THE MALDIVES ISLANDS

The Maldives is located in the Asian continent, specifically on the Indian Ocean and bounded to the south by the Equator. This island is one of the smallest islands, with an area of only a few square meters. With a population of 309 thousand people.

The Maldives was occupied by Britain, and remained under British occupation for many years. After that, the Maldives gained independence from British rule in the year 1357 AD, It became an independent island and developed itself from all sides.

The language of the Maldives is the Divehi, the official language spoken by the people of the Maldives. This language is characterized by a lot of vocabulary and terminology that belong to the Arabic language.

Maldives is one of the most beautiful tourist spots in the world. It is characterized by the presence of charming and beautiful landscapes, and the beautiful atmosphere which is suitable for all tourists who come from all over the world.

The Maldives has the largest number of tourist resorts, where the tourist gets the pleasure, rest and recreation. It is one of the islands that rises above sea level, and there are many tourist attractions worth visiting by tourists.

BULLYING

Bullying is the practice of a type of aggressive behavior by a person or a group of people on another person, whether verbally or physical and psychological harassment, and this act does not come from one time but rather is a continuous act that is repeated at intervals, and the person who does this act is described as a bully. And he makes fun of another person for a number of reasons, and the practice of bullying comes as a result of this person's discovery of an imbalance of power.

THE SPACE

Outer space begins about 100 km above the Earth, where the shell of air around our planet disappears. With no air to scatter sunlight and produce a blue sky, space appears as a black blanket dotted with stars. Space is usually regarded as being completely empty. But this is not true. The vast gaps between the stars and planets are filled with huge amounts of thinly spread gas and dust. Space is also filled with many forms of radiation that are dangerous to astronauts. Much of this infrared and ultraviolet radiation comes from the Sun. High energy X-rays, gamma rays and cosmic rays – particles travelling close to the speed of light – arrive from distant star systems. In space, no one can hear you scream. This is because there is no air in space. Sound waves cannot travel through a vacuum.
