Writing

Write an article describing **the job you would like to have in the future.**

Pilot

"Think about a job where you can fly planes, see new places, and have fun. This job is being a pilot. It can be hard but also very cool.

Pilots need to be good at solving problems. They need to know how to fly planes and go through different weather. Knowing about different planes and how to find their way is important. They also need to work well with others, as they often work with other crew members.

I think I would be good at this job because I love flying and learning about planes. I've been studying physics and geography, which are important for understanding how to fly. I'm good at working with others and I like the challenge of flying in different conditions.

In short, it's the perfect job for me! My next step is to go to flight school and see if I can make my dream come true!"

Doctor

"Imagine a job where you can help people, solve medical problems, and make a difference in the world. This job is being a doctor. It's a job that can be challenging but also very rewarding.

Doctors need to be good at problem-solving. They need to understand how the human body works and how to treat illnesses. Knowing about different medical conditions and treatments is important. They also need to be able to work well with others, as they often work in teams with other healthcare professionals.

I think I would be good at this job because I love helping people and I enjoy learning about medicine. I've been studying biology and health for the past few years now. I'm good at working with others and I enjoy the challenge of solving medical problems.

In short, it's the perfect job for me! My next step is to apply to medical school and see if I can make my dream come true!"
