## General Notes & Recommendations

- The teaching package components are full and extensive. (Refer to the introduction in the teacher's book for more details.) Teachers should make use of ALL the teacher's resources.
- In addition to promoting independent learning, **workbook** materials reinforce concepts and support classroom teaching. Therefore, teachers should select materials that align with their instruction, help students acquire target skills, and facilitate the assessment of module outcomes.
- The **grammar reference** section is an essential part of the textbooks and should be exploited appropriately: teachers can use them as a discovery task or as a post-teaching consolidation to clarify and check understanding.
- The **enrichment lessons** (listed in the table above) can be exploited to enhance reading and writing skills aligned with the plan entitled (literacy plan). Make sure to utilize them to address all students' needs.
- **Project lessons** will be taught within 2/3 blocks.
- A **brief quiz** should be designed to take only 10–15 minutes to ensure efficient time management.
- All the **support lessons** will be dedicated to enhancing reading and writing skills aligned with the plan titled (Literacy Plan). Make sure to utilize the students' notebooks. In support lessons, you need to incorporate the appropriate competencies, values and cross-cutting issues based on the content you select to support students' literacy skills.
- **In week 15**, you can teach the rest of module 9 instead of support lessons.
- During exam periods, teaching hours are redirected towards support sessions rather than continuing with the planned material.
- **Revision lessons:**

- Teachers should use the data collected throughout the module, such as assessment results, classroom performance, and observed areas of difficulty, to plan revision activities that address actual learning gaps and reinforce key concepts where support is most needed.
- Revision lessons should be targeted, purposeful, and should address the specific skill gaps identified through assessment data and teacher observations.
- in the revision lessons, the content of Round up lessons in the main resources can be exploited to prepare students for End-term exams.
- **Values and Competencies:**
  - **Values education** has been taken into consideration while designing the course.
  - Teachers should identify core values, such as honesty, respect, responsibility, empathy, and perseverance, etc. and instill them in their students to foster ethical behavior. Teachers should discuss with their students the importance of such values for their personal growth and interactions with others.
  - Teachers should carry out activities in ways that guide students to understand their place in the classroom and in school, in their family and in the wider community, and as citizens of the world. Simultaneously, they become conscious of their respective rights and responsibilities.
  - **Key competencies** are woven into the resource activities, and students are expected to be constantly acquiring and developing them. The activities require students to activate the knowledge, skills, and attitudes leading to the development of different competencies. Yet, the teachers should:
    - use approaches for delivering the activities that maximize the benefit for all students.

---	----------------------------	--

- use the activities to promote positive relationships among students; encourage teamwork, collaboration, and mutual respect, etc.
- implement activities that build empathy, conflict resolution, skills building, and effective communication.
- **The learning outcomes** mentioned above are NOT exhaustive. They only aim to provide guidance on determining the end goals of each module.
  - Module outcome(s) should incorporate the appropriate match of competencies and values/cross-cutting issues in the outcome(s) of each module.
  - Lessons should be planned in ways that lead to the achievement of the module outcome(s); Lesson components/elements should gradually build student competency toward the mastery of the targeted language skill.
  - Teaching material (textbooks and/or supplementary) and formative assessment should be aligned with the module outcome(s)
