**Reading Comprehension:****Directions: Read the passage and answer the questions.**

The black rhino is one of the most famous endangered species. The homeland of the black rhino is South Africa. There are now over 6000 black rhinos on Earth. Five years ago, there were 2500 of them.

Black rhinos are found in shelters called conservations. A group of special vets and rangers take care of them. They protect the black rhino from hunters. People hunt black rhinos for their horns, which are very expensive. That's why they **prevent** hunting the black rhino. Fires also destroyed their habitats and made life more difficult for them.

In shelters, they provide the black rhino with food, water and medicine. However, these shelters are in need for people who can donate money or help them for free. We should all work together to save these kinds of animals.
