Reading Comprehension:

Directions: Read the passage and answer the questions.

(1) Watches are small devices that people wear on their wrists to keep track of time. They come in many styles, from simple designs to fancy, high-tech smartwatches. Some watches are made with leather straps, while others have metal or plastic ones. Watches not only tell the time but can also be used for various other functions like setting alarms, counting steps, and tracking heart rates, especially in smartwatches.

(2) Watches have been found in different shapes, and their designs have developed over time. The first watches were made in the 16th century and were worn as chains or small clocks. Today, watches have become a way to express personal style. Some people collect rare or old watches as a hobby. Watches remain a popular accessory all over the world.

5- What is the text MAINLY about?

- A. describing hobbies
- B. describing smartwatches
- C. information about straps
- D. information about watches

6- What does the underlined word “express” in paragraph (2) line 3?

- A. talk
- B. grow
- C. show
- D. write

7- What type of watches can track heart rates?

.....

8- When were the first watches made?

.....

9- Why do some people collect old or rare watches?

.....

Part one: Reading

Reading Comprehension:

Read the passage and answer the questions.

Spiders are very strange creatures. They have got eight legs and 48 knees! There are two main kinds of spiders. They are running spiders and jumping spiders. Most spiders can't see very well, but all running and good eyesight. In fact, scientists think that jumping spiders can see better than we can! There are lots of different types of running spiders, and they are all very fast.

Like all spiders, running spiders make silk. However, they don't use it to **create** webs or catch prey. Running spiders don't need webs. They are very good hunters. Jumping spiders are very good at jumping. Like running spiders, jumping spiders sleep in little 'tents' which they also make from silk. They like sunny weather, so they hunt during the day.

Jumping spiders don't create webs, because they jump on their prey to catch it. They plan their jumps very carefully; during the jump, the spider spins a piece of silk starting from the place it jumps from. This is like a 'rope', and it keeps the spider safe from falling and helps it climb back up to its home again.

1. What is the text MAINLY about?

- A.** spiders
- B.** small webs
- C.** sunny weather
- D.** strange creatures

2. What does the underlined word (create) in paragraph two mean?

- A. eat
- B. buy
- C. send
- D. make

3. How many knees have spiders got?

.....

5. Why don't jumping spiders create webs to hunt?

.....
