Reading

Read the following text and answer the questions:

Sunglasses, shades, dark glasses or even sunnies. Whatever you call them, when the sun comes out, they do too. But who were the first people to wear them? Well, in snowy places, the sun can be very bright, and from prehistoric times, ancient Innuits of the Arctic regions wore glasses made of bone with thin holes (slits) in them. These didn't let a lot of light in and protected their eyes. Today, sunglasses are usually plastic and come in all shapes and sizes. People wear them to protect their eyes from the sun's harmful rays while doing outdoor activities or sports, or just because they're in fashion. But many celebrities wear them indoors too, because they want to hide their identity

Volunteers of all ages put on rubber boots and walked into the shallow water with small shovels. Before planting, experts showed everyone how these special green trees protect the local beach from big waves and give fish and birds a safe home. Everyone was excited to work together and help nature.

Groups of people carefully planted hundreds of tiny trees into the soft mud. Neighbors, students, and families worked side by side, getting dirty and laughing together. By the end of the day, as the sun went down over the water, the coast was filled with new baby trees. It felt great to see the real difference a group of people could make in just a few hours.

The game was fast and full of action from start to finish. In the second half, the home team scored a brilliant goal, and the stadium erupted into loud cheers and wild celebrations. People were hugging, clapping, and cheering together in the stands. Even after the final whistle blew, the happy energy remained as families and friends walked out into the cool evening air, talking excitedly about the best moments of the game.
