Comparative and Superlative Forms of Adjectives

The Comparative

Use adjective + -er or *more* + adjective to make the comparative.

Imad is **tall**.

Ahmed is **taller** than Imad.

Imad is **intelligent**.

Ahmed is **more intelligent** than Imad.

Note: The comparative is often used with *than*.

How the form of the adjective changes in the sentences on the right.

why *-er* and *more* have been added to the adjectives.

(The speaker is comparing two people.)

☺ Why do we add *-er* to tall but add *more* before intelligent?

*We add *-er* to most one-syllable adjectives when we make them comparative, and use *more* with most three-syllable adjectives.

☺ What word do we often use with comparative adjectives? (**than**)

Ahmed is **the tallest** boy in the class.

He is also **the smartest**.

Ahmed is **the most intelligent** boy in the class.

He is also **the most athletic**.

How many boys are probably in Ahmed's class, two or more than two? why **-est** and **most** have been added to the adjectives.

(The speaker is comparing more than two people.)

😊 Why do we add **-est** to **tall** but add **most** before **intelligent**?

*We add **-est** to most **one syllable adjectives** when we make them superlative, and use **most** with **most three-syllable adjectives**.

😊 What word do we usually use before superlative adjectives? **(the)**

Welcome to the Van Meer Diamond Company. Before I show you how we cut diamonds, let me tell you a little about the stones.

Diamonds are formed over a period of a billion or more years deep within Earth's crust— about 150 kilometers deep—and are gradually pushed to the surface. Diamonds are the hardest natural substance on Earth, but if you hit a diamond with a hammer, it will break—into many pieces. Also, if you place a diamond in an oven and raise the temperature to about 763 degrees Celsius, it will simply disappear, not leaving even a little ash.

The world's largest diamond was the Cullinan, found in South Africa in 1905. It weighed 3,106.75 karats, uncut. When they found it, the rough diamond was 10 cm long, 6 cm high, and 5 cm thick. It was cut into 9 large gemstones and many smaller fragments. The largest of the cut diamonds is called the Great Star of Africa and weighs 530.2 karats (106 grams). The Lesser Star of Africa is 317.4 karats. These diamonds now belong to the British Crown, and they form part of the world's biggest collections of jewels. The Cullinan diamond collection is estimated to be worth over \$400 million.

Now follow me and let's see how...

What a Snowman!

A group of seventh graders at Telstar Middle School in Bethel, Maine, did something very unusual. They built the world's **(1) tallest** (tall) snowman. They made their snowman in February, 1999, and they named him Angas after the governor of the state of Maine.

Angas was 113 feet and 7 inches tall (35 meters). He was the **(2) biggest** (big) snowman ever. The students used 200,000 cubic feet (5,660 cubic meters) of snow for Angas. His arms were 10 feet (3 meters) long. His hat was twenty feet (6 meters) high. One student said, "I think that this is the **(3) largest** (large) hat in the world! It's big enough for forty or fifty people!" Can you imagine a 120-foot-long (37-meter-long) scarf? Angas's scarf was **(4) longer** (long) than a school bus! One student said, "This was the **(5) best** (good) and the **(6) most exciting** (exciting) school project ever!"

The students don't know how long they can hold the world record. Some children in Japan said that they want to build a **(7) taller** (tall) snowman than Angas. I guess we are going to have to wait and see what happens.

E Read the story in exercise **D** again. Answer **yes** or **no**.

1. **yes**___ Angas was the name of a governor of Maine and of a snowman.
2. **no**___ Children in New York made the biggest snowman in 1999.
3. **yes**___ The snowman had a hat and a scarf.
4. **yes**___ The snowman was part of a school project.
5. **no**___ Children in Mexico want to build a bigger snowman than Angas.

F Complete the sentences with comparative and superlative forms. Use the adjectives in parentheses.

1. (expensive) The most expensive camera cost \$60,000. It is an old camera from 1901. That's a lot more expensive than today's disposable digital cameras. These cost only \$10 to \$15.
2. (successful) One of the most successful novels of all time is *A Tale of Two Cities* by Charles Dickens. It sold over 200 million copies. It is even more successful than Tolkien's *The Hobbit*.
3. (rich) Many of the richest people made their money in the computer industry. Bill Gates of Microsoft is richer than any king or queen in the world.
4. (big) The biggest burger was 5,000 pounds (2,270 kilograms). People in the state of Wisconsin made it. That's bigger than some elephants.

The end

Language Builder

We can use both *-er* or *more* and *-est* or *most* with many two-syllable adjectives; for example, *politer* and *more polite* are both correct.

We usually use *-er* and *-est* with adjectives ending in *-y*, *-ow*, *-le*, and *-er*; for example: *heavier*, *narrower*, *simpler*, and *cleverer*.

We use *more* or *most* with two-syllable adjectives ending in *-ed*, *-ing*, *-ful*, and *-less*; for example: *more tired*, *more boring*, *more stressful*, and *more careless*.

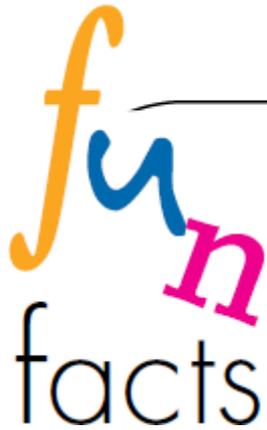

Teaching Tip

When a rule is presented, encourage students to find exceptions to the rule. Having students recall information they have been taught reinforces that they have made progress in learning English.

Additional Activity

In groups, have students express their opinions about two or more things; for example, animals, books, cities, or sports. Begin the discussion by asking: ***What do you think of (book) and (book)?*** Then have students ask one another the questions.

Some people estimate the monetary value of the Crown Jewels at £20 billion, but their historical and symbolic value is priceless.
