E-Learning Is Easy!

You see a young executive in a public place staring into his laptop and you think: “Oh, poor guy, he’s working so hard.” But, in fact, perhaps he’s looking at Facebook or Skype. Perhaps he’s chatting online with friends or watching a video from his family who lives far away. The Internet makes it easy to communicate. Lots of people share photos and videos with their family and friends. Webcams also make it possible for others to see you when you are talking online. But web videos and webcams are much more than that. They are becoming popular tools for e-learning. Many teachers today show web videos in their classrooms. What better way to help students understand geography or science. And there are thousands of video clips to choose from—you can see active volcanoes, the latest developments in technology, or learn more about global warming. For some students and teachers, the Web is their classroom. More and more students are taking online lessons. Some language students, for example, learn on their own from websites, and others connect with their teacher online with the help of a webcam. There are also online schools like the Khan Academy with over 3,000 video lessons in math, science, economics, and history—and it’s absolutely free. Do you want to know how to make a cheesecake or learn how to play golf? Free how-to videos online can teach you. Anyone can e-learn, and it’s easy!

1. The Internet makes it easy to communicate ( )
2. No one can share photos and videos online ( )
3. Many teachers today show web videos in their classrooms ( )
4. Students can't take online lessons ( )
5. Anyone can e-learn, and it’s easy! ( )

Writing

Write a short paragraph about (The Benefit of the internet)
