ENDANGERED ANIMALS IN MALAYSIA

Malaysia is famous for its interesting wildlife. However, many of the animals are in danger of being extinct soon. Let's read up on some of these endangered animals.

The orangutan is well-known for its shaggy orange fur and long arms. It lives in the rainforest and loves to swing from tree to tree. It feeds on leaves, fruits, nuts and insects. The orangutan is endangered because of deforestation and illegal hunting.

The tapir is a mammal. It has a trunk which is actually its upper lip and part of its nose. It uses the trunk to pluck fruits and grab branches. The tapir's black and white body helps it to hide from its enemies. The tapir loves to swim and play in the mud.

The Borneo Pygmy elephant lives in the jungle. It is the smallest of all the Asian elephants. It has big ears, a plump belly and very long tail. It eats roots, leaves, bananas and sugar cane. It is currently endangered because of illegal hunting.

1. The orangutan is famous for its _____ and long arms.
2. The _____ loves to swing from tree to tree in the rainforest.
3. The _____ uses its trunk to grab branches and pluck fruits.
4. The tapir has a _____ body which helps it to hide from its enemies.
5. The Borneo Pygmy elephant is the smallest of all _____.
6. The Borneo Pygmy elephant eats _____ and sugar cane.

Performance Level (PL)

1. Very Limited

2. Limited

3. Satisfactory

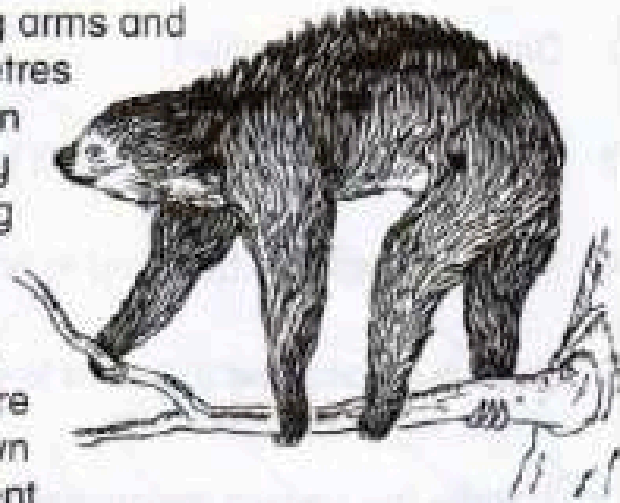

4. Good

5. Very Good

6. Excellent

A Read some facts about sloths.

Sloths live in the tropical forests of Central and South America. They look like monkeys, with their long arms and shaggy fur. Sloths can be from 0.6 to 0.8 metres long, and depending on their species, they can weigh from 3.6 to 7.7 kilogrammes. They enjoy spending their time on trees because their long claws, which are about 8 to 10 centimetres long, make it difficult for them to walk on the ground. Sloths can sleep for about 20 hours a day, so they enjoy being by themselves. There are two species of sloths. Sloths are known for their slow movement, but they are excellent swimmers.

**B** State TRUE or FALSE for the following statements. Then, rewrite the statements that are FALSE.

1 Sloths live in the tropical forests of Central and South America.

2 Sloths are about 0.5 to 0.7 metres long.

3 They enjoy spending their time on the ground.

4 Sloths like to be alone.

5 Sloths are famous for their long claws.
