Reading

9 Read the text and choose the correct answers.

Almost everyone watches television. It's a very important part of everyday life and it is difficult to imagine life without television. Today, we have digital television, you can also watch television programmes on your personal computer and even on your mobile phone. But do you know who invented the first television system and when it was invented? The Scottish inventor and engineer, John Logie Baird, is often known as 'the father of television' because he invented the world's first working television system. Baird was born in 1888 in a small town near Glasgow, Scotland. As a young man he was very interested in technology and he studied technology at the West of Scotland Technical College. Later, he was studying at the University of Glasgow when the First World War started and, unfortunately, he never completed his studies. After the war, Baird moved to England and began working to develop a television system. In 1923, in the town of Hastings on the south coast of England, Baird transmitted a moving image for the first time and in 1925 he transmitted the world's first television picture. In 1927, Baird sent a long-distance television signal using telephone lines from London to the Central Hotel in Glasgow, a distance of 438 miles (705 kilometres) and the following year he sent a picture from London to New York. In the same year, the Baird Television Development Company made the first television programme for the BBC. In 1939, Baird helped to develop colour television. He also invented a video recording system. Baird invented a number of other things, including thermal socks! He died in 1946.

- 1 Where was John Logie Baird born?
a) Glasgow b) London c) near Glasgow
- 2 How old was he when he died?
a) 58 b) 68 c) 78
- 3 When did he transmit a moving image for the first time?
a) 1923 b) 1925 c) 1929
- 4 Who made the first television programme for the BBC?
a) John Logie Baird b) the Baird Television Development Company c) the BBC
- 5 When did Baird transmit the world's first television picture?
a) 1923 b) 1925 c) 1929
- 6 When did Baird send a picture from London to New York?
a) 1927 b) 1928 c) 1929

10 Read the text again and answer the questions.

- 1 Find three ways of watching TV programmes in the text.

- 2 Why didn't Baird complete his studies?

- 3 Name three other products that Baird helped to develop.

4 What was Baird interested in as a young man?
