- 1) Find the surface area of a cube whose side length is 6cm.
- 2)

1. Find the surface area and lateral area of each cuboid / cube. All lengths are in centimetres.

3)

Find the area of the following polygons.

7. Find the area of the hexagon ABCDEF in two ways:
 (a) By splitting into two congruent triangles and a rectangle.
 (b) By splitting into two congruent trapeziums.

4) The difference of the parallel sides of a trapezoidal field is 20m. Its area is 450 m^2 and its altitude is 15m. Find the length of the parallel sides.

5) Two parallel sides of an isosceles trapezium are 31 cm and 15 cm. Its non-parallel sides are each equal to 17cm. Find the area of the trapezium.
